Phase I Environmental Site Assessment

for the

Bonita Estero Rail Trail (BERT)
Lee and Collier Counties, Florida

July 21, 2026

Prepared for:

TRUST FOR PUBLIC LAND™

Prepared by:

S&S ENVIRONMENTAL CONSULTANTS, LLC

Notice

This Phase I Environmental Site Assessment (ESA) report is presented for the use of the Trust for Public Land (TPL), the Village of Estero, the City of Bonita Springs, and Collier County (hereinafter referred to jointly as Users or "the client"), their agent(s), successors, and assigns. The information and conclusions reached herein are not intended to be relied on by any other person or entity. Though legal and/or regulatory information may be contained herein, said information is not intended to constitute legal advice or opinion, and, to the extent such legal advice or opinion is required, the client is advised to seek the advice of legal counsel. The findings contained herein are limited by the scope of the field activities specified in the report and the quality and type of information provided and/or made available to S&S Environmental Consultants, LLC (S&S) for review and are subject to revision if additional or more definitive information becomes available.

Executive Summary

S&S Environmental Consultants LLC (S&S) performed a Phase I Environmental Site Assessment (ESA) for the Trust for Public Land (TPL), the Village of Estero, the City of Bonita Springs, and Collier County, i.e., the Users of this Phase I ESA. This Phase I ESA has been prepared in response to the Notice to Proceed (NTP) received from TPL on July 1, 2026.

The purpose of the Phase I ESA was to determine if there are potential recognized environmental conditions (RECs), historical recognized environmental conditions (HRECs), or controlled recognized conditions (CRECs) at the subject property. This Phase I ESA was conducted in general conformance with American Society for Testing and Materials (ASTM) E1527-21, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process," and the U.S. Environmental Protection Agency's (USEPA's) "Standards and Practices for All Appropriate Inquiries" (AAI) Final Rule, as promulgated on November 1, 2005 (amended December 15, 2022).

The subject property is an approximately 11.4-mile, unused railroad right-of-way (ROW) beginning immediately south of Estero Parkway extending south to Railhead Scrub Preserve in Collier County (see Figures 1, 2A, 2B, and 2C). According to information obtained from the Lee County and the Collier County Property Appraiser offices, the subject property is comprised of sixteen parcels (see Section 1 and Appendix A). The center of the subject property has an approximate latitude and longitude of 26.370759N and -81.802379W in Sections 02, 03, 10, 15, 22, 26, 27, 28, 33 and 35; Townships 46, 47, and 48 South, Range 25 East.

S&S representatives Richard Stephens, the S&S qualified environmental professional (QEP) for this Phase I ESA and Mr. Chris Kennedy, S&S Staff Scientist, conducted the site reconnaissance on July 8, 20263, 2026.

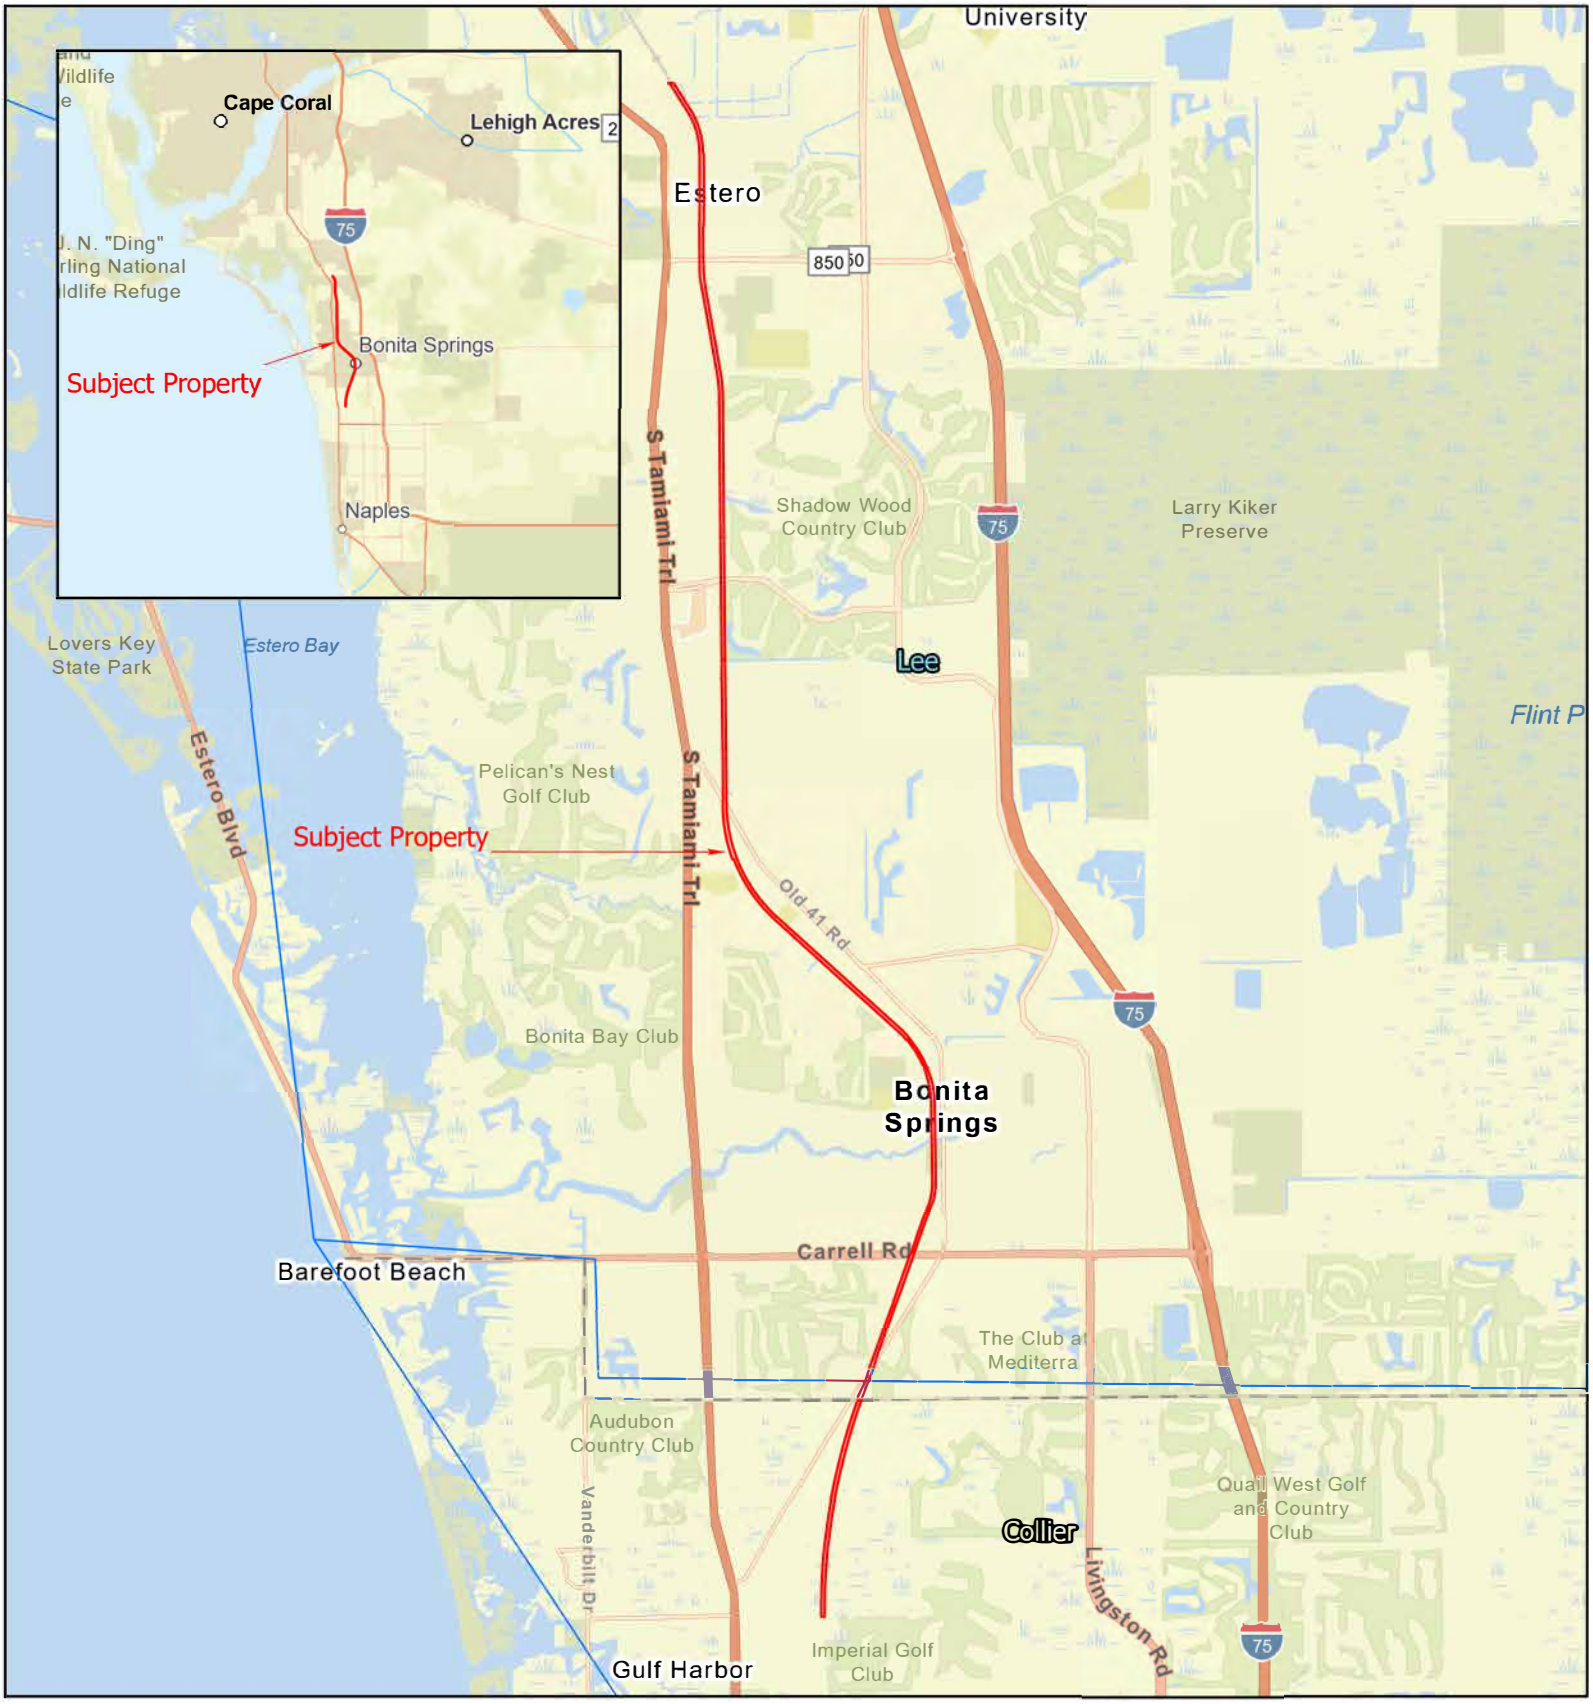
Findings

A site map showing the general findings of the site reconnaissance are provided as Figures ES2A, ES2B and ES2C.

- The subject property was first developed as a railroad corridor in the 1920s. Residual contamination from former railroad operations may exist at the subject property. Some historic railroad operations involved the use of chemicals that may have resulted in the presence of contamination today. The most commonly reported contamination along rail lines includes metals, pesticides (such as lead arsenate), and constituents of oil or fuel (petroleum products). These chemicals have been associated with normal railroad operations and are likely to be found anywhere along the corridor. For example, it would not be uncommon to find arsenic present in the soil along a ROW from old railroad ties dipped in an arsenic solution, arsenic weed-control sprays, and arsenic-laced slag used as railroad bed fill. Lubricating oil and diesel that dripped from the trains are likely sources of the petroleum product found along the lines. Other sources of contaminants associated with historic railroad operation may include coal ash from engines, creosote from ties, and polynuclear aromatic hydrocarbons (PAHs) from the diesel exhaust (Commonwealth of

Massachusetts 2016). The potential presence of heavy metals (arsenic and lead) and PAHs should be considered an REC.

- The Tisch Laundry site (USEPA # FLD981859820; see Section 4.2) is located immediately adjacent to the subject property on West Terry Street in Bonita Springs. Tisch Laundry is under long-term monitoring for groundwater contamination. Based on the site file review and discussion with the USEPA project manager, groundwater beneath the railroad ROW may be impacted by chlorinated drycleaning solvents. The potential presence of contamination in the shallow groundwater beneath the subject should be considered a REC.



Conclusions and Opinions

S&S has performed a Phase I ESA of the subject property in general conformance with the scope and limitations of ASTM E1527-21 and the USEPA AAI. Exceptions to, or deletions from, this practice are described in Sections 1.2 and 1.3. The subject property is an 11.4-mile, unused railroad ROW that begins immediately south of Estero Parkway in the Village of Estero, extends south through the City of Bonita Springs, and then terminates at the southern end of the Railhead Scrub Preserve in Collier County (see Figures ES1, ES2A, ES2B, and ES2C). This assessment has revealed the following RECs in connection with the subject property.

- The subject property has been a railroad ROW since the 1920s and, as such, the soils along the ROW may have been impacted by railroad operations.

- The Tisch Laundry site is under long-term monitoring, and the available site information suggests that groundwater beneath the subject property may be impacted with drycleaning solvents.

It is our opinion that a Phase II ESA is warranted for this subject property.

Glossary of Key Terms

Recognized Environmental Condition (REC) — The term *recognized environmental condition* means (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A *de minimis* condition is not a recognized environmental condition.

Controlled Recognized Environmental Condition (CREC) — A recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls.

***De minimis* condition** — A condition related to a release that generally does not present a threat to human health.

Environmental professional — A person meeting the education, training, and experience requirements as set forth in 40 Code of Federal Regulations (CFR) § 312.10(b).

Historical Recognized Environmental Conditions — A previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls.

Key site manager — The person identified by the owner or operator of a subject property as having good knowledge of the uses and physical characteristics of the subject property.

Owner — Generally the fee owner of record of a property.

Release — A release of any hazardous substance or petroleum product shall have the same meaning as the definition of "release" in Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) 42 United States Code § 9601(22). There are a number of statutory exclusions from the definition of release that may impact the environmental professional's opinions and conclusions, such as the normal application of fertilizer.

subject property — The property that is the subject of the environmental site assessment described in ASTM International (ASTM) E1527-21, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process."

User — The party(ies) seeking to use ASTM E1527-21 to complete an environmental site assessment of the subject property.

1 Introduction

S&S Environmental Consultants LLC (S&S) performed a Phase I Environmental Site Assessment (ESA) for the Trust for Public Land (TPL), the Village of Estero, the City of Bonita Springs, and Collier County, i.e., the Users of this Phase I ESA. This Phase I ESA has been prepared in response to the Notice to Proceed (NTP) received from TPL on July 1, 2026.

The Bonita Estero Rail Trail (BERT; subject property) is an approximately 11.4-mile, unused railroad right-of-way (ROW) beginning immediately south of Estero Parkway extending south to Railhead Scrub Preserve in Collier County (see Figures 1 and 2). For the purposes of this Phase I ESA, we have subdivided the subject property into the following three sections.

- **Estero (northern section)** – begins at Estero Parkway and extends south to just north of Bonita Bill Street in Bonita Springs.
- **Bonita Springs (central section)** – extends south from Bonita Bill Street to Channel 30 Drive.
- **Collier County (southern section)** – extends south from Channel 30 Drive and terminates at Railhead Scrub Preserve.

According to information obtained from the Lee County Property Appraiser (LCPA) and Collier County Property Appraiser (CCPA), the subject property is comprised of the following sixteen parcels (Appendix A). Fifteen parcels are in Lee County (seven in Estero and eight in Bonita Springs) and one parcel is in Collier County.

Lee County Parcels:

Estero: 284625E2U19492522, 284625E3U19562448, 334625E2U19562388, 334625E3U19642308, 034725E1U19782168, 104725E1U19792047, and 104725E4U19801966.

Bonita Springs: 154725B1000010000, 224725B4000010000, 274725B2000030000, 264725B1000010000, 354725B1000010010, 354725B4000010000, 024825B1000130000, and 034825B3000040000.

Collier County Parcel: 00145681504

The center of the subject property has an approximate latitude and longitude of 26.370759N and -81.802379W in Sections 02, 03, 10, 15, 22, 26, 27,27, 28, 33 and 35; Townships 46,47, and 48 South, Range 25 East. This report presents the findings, opinions, and conclusions made as a result of assessing the subject property. The following appendices are also provided in support of this Phase I ESA.

- Appendix A – County Records: Lee and Collier County

- Appendix B – Title Search
- Appendix C –Envirosite Government Records Report
- Appendix D – Envirosite Historical Topographic Map Report
- Appendix E – Natural Resources Conservation Service Custom Soil Resource Report for Pinellas County, Florida – Bonita Estero Rail Trail
- Appendix F – Federal Emergency Management Agency Map
- Appendix G – Envirosite Environmental Liens and Activity/Use Limitations Reports
- Appendix H – Questionnaires
- Appendix I – Envirosite Historical Aerial Photo Report
- Appendix J – Envirosite Historical Fire Insurance Maps Report
- Appendix K – Photographic Log
- Appendix L – Environmental Professional Resume

In addition, the following contractor's checklist identifies sections of this report where relevant information can be located by the reader.

Bonita, Estero, Rail Trail (BERT).

10) Page # 8/9 — Groundwater information.

11) Page # 37 — Data failure information.

12) Page # 35, 36, 38 & Executive Summary — Discussion and evaluation of findings, conclusions and recommendations.

1.1 Purpose

The purpose of this Phase I ESA is to identify actual and potential recognized environmental conditions (RECs), historical recognized environmental conditions (HRECs), or controlled recognized environmental conditions (CRECs) associated with the subject property. This Phase I ESA was conducted in general conformance with American Society for Testing Materials (ASTM) E1527-21, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process."

On December 15, 2022, the United States Environmental Protection Agency (USEPA) published a Final Rule adopting ASTM E1527-21 as a standard satisfying the "all appropriate inquiries" (AAI) requirement for landowner liability defenses under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). As such, this assessment addresses RECs that indicate: (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. RECs do not include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies.

1.2 Scope of Services

This Phase I ESA was performed in accordance with ASTM E1527-21, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process." S&S reviewed readily available public records to determine the current and historical use of the subject property. S&S also examined readily available historical documents, governmental databases, deed records, aerial photographs, and governmental environmental files; conducted interviews with persons familiar with the subject property and/or surrounding area; and performed a site reconnaissance of the subject property to identify potential RECs that exist or may have existed at the site. Limitations, ASTM deviations, and significant data gaps (if identified) are noted in the applicable sections of this report.

S&S did not complete a chain-of-title search as part of this Phase I ESA; however, property records from Lee and Collier Counties were obtained and reviewed (Appendix A). Additionally, S&S did not perform a property valuation reduction for environmental issues as part of this Phase I ESA.

1.3 Limitations and Exceptions

This Phase I ESA is limited to the subject property, as described by TPL and detailed in Section 2.1. The information provided in this report is based on a review of the documents identified in Section 1.2; interviews with knowledgeable individuals; information provided by TPL, Lee County, Collier County, the Village of Estero, the City of Bonita Springs; and observations by an environmental professional.

The results, findings, opinions, and conclusions of this ESA are valid as of the date of the report. This ESA does not include any environmental sampling. Additionally, this ESA does not include an evaluation of non-scope items, per Section 13 of ASTM E1527-21.

1.4 Standard of Care

This Phase I ESA was performed in accordance with the accepted practices of this profession. Any specific limitations to this accepted standard are discussed in the text of this report and an evaluation of their significance is presented in Section 9. Phase I ESAs are of limited scope, non-invasive, and cannot eliminate the potential that hazardous, toxic, or petroleum substances are present or have been released at the site beyond what is identified by the limited scope of this ESA. No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs. No warranties, express or implied, are intended or made. The limitations herein must be considered when the User of this report formulates opinions as to risks associated with the site or otherwise uses the report for any other purpose. These risks may be further evaluated—but not eliminated—through additional research or assessment. We will, upon request, advise TPL, the Village of Estero, the City of Bonita Springs, and Collier County of additional research or assessment options that may be available and the associated costs.

1.5 User Reliance

This Phase I ESA was prepared for the exclusive use and reliance of TPL, the Village of Estero, the City of Bonita Springs, and Collier County. The continued viability of this report is subject to ASTM E1527-21, Sections 4.6 and 4.8. If the Phase I ESA will be utilized by a different user (third party) than the one for whom the Phase I ESA was originally prepared, the third party must also satisfy the User's responsibilities in Section 6 of ASTM E1527-21 and the USEPA's AAI Final Rule, as amended. Key viability dates for this Phase I ESA are provided in Table 1.

2 Site Description

2.1 Location and Legal Description

The subject property is an approximately 11.4-mile, unused railroad ROW that begins immediately south of Estero Parkway, extends south through the City of Bonita Springs, and terminates at the southern end of the Railhead Scrub Preserve in Collier County (Figures 1, and 2A through 2C). According to information obtained from the LCPA and CCPA, the subject property is comprised of sixteen parcels (see Section 1 and Appendix A). The center of the subject property has an approximate latitude and longitude of 26.370759N and - 81.802379W in Sections 02, 03, 10, 15, 22, 26, 27, 28, 33 and 35; Townships 46, 47, and 48 South, Range 25 East.

The legal description for the subject property is provided in the Commonwealth Land Title Insurance Company Title Commitment (Appendix B).

> *A strip of land 130 feet wide being 65 feet on each side of the center line of the Fort Myers Southern Railroad as located and constructed through the east halves of Sections 10 and 15, Township 48 South, Range 25 East, extending southerly from the North line of Section 10 Township 48 South, Range 25 East to the Northerly right of way line of Wiggins Pass Road, being in Collier County, Florida. Also being Collier County Property Appraiser's Parcel No. 00145681504.*
>
> *AND*

>
> *The West 1/2 of Section 3, Township 47 South, Range 25 East;*
>
> *The West 1/2 of Section 10, Township 47 South, Range 25 East, lying North of Coconut Road and lying South of Coconut Road;*

The West 1/2 of Section 15, Township 47 South, Range 25 East;

Southeasterly through Section 22, Township 47 South, Range 25 East;

The Northeast 1/4 of Section 27, Township 47 South, Range 25 East;

Southeasterly through the West 1/2 of Section 26, Township 47 South, Range 25 East (being 100' thru the South 1/2 of Sec 26);

The West 1/2 of Section 35, Township 47 South, Range 25 East, lying North of River and the West 1/2 of Section 35, Township 47 South, Range 25 East, lying South of River, (Less that part in DB 292-458);

The West 1/2 of Section 2, Township 48 South, Range 25 East and

The Southeast 1/4 of Southeast 1/4 of Section 3, Township 48 South, Range 25 East

ALL OF THE ABOVE DESCRIBED LAND ALSO BEING DESCRIBED AS FOLLOWS:

Segment 1: Estero

A segment of the above-described strips of land lying between approximately Mile Post 979.4 and approximately Mile Post 983.5, said segment being approximately 4.1 miles long and located in Lee County.

AND ALSO:

Segment 2: Bonita Springs

A segment of the above-described strips of land lying between approximately Mile Post 983.5 and approximately Mile Post 989.3, said segment being approximately 5.8 miles long and located in Lee County.

AND ALSO:

Segment 3: Unincorporated Collier County

2.2 Site and Vicinity General Characteristics

The following site and vicinity general characteristics were obtained from the Envirosite Radius Map Report with GeoCheck (Appendix C), the Envirosite Historical Topographic Map Report (Appendix D), and other applicable records. Full references for all resources used in the preparation of this report are provided in Section 10.

2.2.1 Topography, Physiography, and Geology

The subject property is generally flat with an average surface elevation of 12 feet (ft) above mean sea level (AMSL; Appendices C and D).

Regional and local geology and hydrogeology were obtained from the 2007 "Site Assessment Report 7-Eleven #32597" (Facility ID: 36/9800973) located at 26975 Old U.S. Highway 41 Bonita Springs, Florida.

The geology of southwestern Florida is comprised of sedimentary rocks of the Cenozoic age. In geologic time, these rocks are of relative young age, 65 million years old to present.

The exposed landmass of southwest Florida is primarily the result of climatic fluctuations from the Pliocene age through the Pleistocene Epoch with the advances and declines in sea level 1.8 million to 8,000 years ago. The underlying limerock formations are also of more recent Cenozoic age, with the Suwannee Limestone formed in the Oligiocene, 34 to 24 million years ago. These rocks are primarily carbonates (limestone) in the lower portion with elastics (sand and clay) in the upper part. The movement of groundwater from the inland areas to the Gulf occurs primarily through the carbonate rocks. In this region of Florida, the geologic units generally consist, from oldest to youngest, of the Suwannee Limestone of Oligocene age, Hawthorn Group (Arcadia and Peace River Formations [Fm]) of Oligocene to Pliocene age, Tamiami Fm of Pliocene age, and undifferentiated sediments of Holocene to Pleistocene age.

The Suwannee Limestone is composed of fossiliferous, calcarenitic limestone with minor amounts of quartz sand. The thickness of the limestone varies widely but is commonly greater than 100 meters in Lee and Collier Counties. The basal Suwannee Limestone generally contains fine-grained, phosphatic, elastic material with interbeds of micritine and clay.

The Hawthorn Group is divided into the Arcadia Fm and the Peace River Fm. The Arcadia Fm, which overlies the Suwannee Limestone, consists of fine-grained carbonate sediments, as well as sandy limestone, shell beds, dolomite, phosphatic and carbonate sand, silt and clay. The predominantly elastic Peace River Fm has a highly irregular erosional and karstic surface. The sediments of the Peace River Fm consist of interbedded, fine to coarse grained quartz sand, quartz silt, gravel, clay carbonate, and phosphatic sand. The Tamiami Fm overlies the Peace River Fm and consists of varying amounts of silt, sandy clay, micritic limestone, sandy and shelly limestone, calcareous sandstone, and quartz sand. The lithology of the Tamiami Fm varies greatly because of the complex nature of the depositional environment. The limestone is slightly phosphatic, variably sandy, and fossiliferous. The sand varies from well sorted, clean sand with abundant shells and traces of silt-size phosphate, to clayey sand with sand-size phosphate, clay-size carbonate matrix, and abundant well-preserved mollusk shells . The indifferentiated sediments of Holocene to Pleistocene age overlie the Tamiami Fm at land surface. These deposits mainly consist of quartz sand with minor amounts of shell and clay, and contain limestones, sandstones, and shell beds. With increasing elevation inland, the sand becomes thicker and less calcareous. The sand varies from fine to coarse grained, non-indurated to poorly indurated, and nonclayey to slightly clayey. Included in this group are marine terrace sediments, aeolian sand dunes, fluvial deposits, freshwater carbonated, peats and clay beds.

The three main water-producing aquifers that underlay the area are the Floridan aquifer, the Intermediate aquifer system, and the Surficial aquifer system.

The Floridan aquifer system underlies an area over 100,000 square miles and is a source of water for many major cities in Florida. The recharge area for this aquifer is north-central Florida. The Floridan aquifer is comprised locally of the lower Hawthorn and Suwannee Limestone Fms. In southwest Florida, the water in this aquifer contains levels of salinity above recommended potable (drinking) water standards and requires extensive treatment for use. This aquifer is used for public water supplies in Lee County where the other shallower aquifers are not available in quantity or have been degraded by saltwater intrusion. The Intermediate aquifer system contains both the Sandstone and the Mid-Hawthorn aquifers, along with the confining basal layers that underlie each within the Hawthorn Group. The Intermediate aquifer system extends beneath a twelve-county area in southwest and west-central Florida. This system contains water that is under confined conditions; that is, the aquifer is underlain and overlaid by confining layers. This aquifer is not as productive as the Floridan, and consequently, not studied as extensively. However, it is of great significance as it is the main water supply of Lee, Charlotte, and Sarasota Counties. The Surficial aquifer system comprises two aquifers: the water table aquifer and the lower Tamiami aquifer. Throughout many areas of Lee County, these two aquifers function as one aquifer with the absence of a confining layer between them.

Site-specific geology does not exist for the subject property. General site lithology was obtained from the 2008 "Pilot Test Plan for the 7-Eleven Store No. 32597" (Florida Department of Environmental Protection [FDEP] Facility ID No. 36/9800973). The site lithology at this site was summarized as follows.

- Surface to 2 ft below land surface (bls): A mix of coarse, medium- to fine-grained, white to light brown, silica sands mixed with limestone fragments ranging from approximately 5 to 15 percent (%).
- 2 to 8 ft bls: a mix of pea gravel; fill sand; and white, tan, gray, and brown, medium- to fine-grained sands.
- 8 to 22 ft bls: clayey sand and gray and brown and light brown, medium- to fine-grained silica sands with shell fragments, in addition to weathered and compacted limestone.
- 22 to 46 ft bls: clayey sands.
- 46 to 50 ft bls: clayey sand mixed with limestone fragments.

Depth to water has ranged from approximately 6.5 to 9.5 ft bls across the site with recent depths being approximately 8 ft bls.

2.2.2 Soils

Soils data on the subject property is provided in Tables 2A (Estero), 2B (Bonita Springs), and 2C (Collier County). Also see Appendix E.

Immokalee sand-Urban land complex, 0 to 2% slopes, is the most prevalent soil unit in the Estero section of the subject property, encompassing 26.5% or 17.7 acres of the subject property.

Table 2A: Estero – Soil Resource Report

Map Unit Name	Acres in Area of Interest	Percent of Area of Interest (%)
Immokalee sand-Urban land complex, 0 to 2 percent slopes	17.7	26.5
Felda fine sand, frequently ponded, 0 to 1 percent slopes	0.6	0.9
Floridana sand, frequently ponded, 0 to 2 percent slopes	0.5	0.7
Brynwood fine sand, wet-Urban land complex, 0 to 2 percent slopes	5.0	7.4
Pineda fine sand, frequently ponded, 0 to 1 percent slopes	0.0	0.0
Cypress Lake fine sand-Urban land complex, 0 to 2 percent slopes	2.8	4.3
Malabar fine sand-Urban land complex, 0 to 2 percent slopes	3.3	5.0
Pineda fine sand-Urban land complex, 0 to 2 percent slopes	8.2	12.3
Pineda fine sand, ponded-Urban land complex, 0 to 1 percent slopes	0.5	0.8
Pompano fine sand-Urban land complex, 0 to 2 percent slopes	3.0	4.5
Pompano fine sand, ponded-Urban land complex, 0 to 1 percent slopes	1.8	2.7
Valkaria fine sand-Urban land complex, 0 to 2 percent slopes	11.1	16.7
Cocoa fine sand-Urban land complex, 0 to 2 percent slopes	10.6	16.0
Brynwood fine sand, slough-Urban land complex, 0 to 1 percent slopes	1.4	2.2
Totals	**66.5**	**100**

Brynwood fine sand, wet-Urban land complex, 0 to 2% slopes, is the most prevalent soil unit in the Bonita Springs section of the subject property, encompassing 22.4% or 19.5 acres of the subject property.

Table 2B: Bonita Springs – Soil Resource Report

Map Unit Name	Acres in Area of Interest	Percent of Area of Interest (%)
Immokalee-Oldsmar, limestone substratum-Urban land complex, 0 to 2 percent slopes	0.1	0.1
Matlacha gravelly fine sand-Urban land complex, 0 to 2 percent slopes	4.2	4.9
Immokalee sand-Urban land complex, 0 to 2 percent slopes	15.5	17.8
Brynwood fine sand, wet-Urban land complex, 0 to 2 percent slopes	19.5	22.4
Waters of the Gulf of America	0.2	0.3
Cypress Lake fine sand-Urban land complex, 0 to 2 percent slopes	7.5	8.6
Copeland fine sandy loam, ponded-Urban land complex, 0 to 1 percent slopes	0.9	1.1
Felda fine sand, ponded-Urban land complex, 0 to 1 percent slopes	1.3	1.5
Isles fine sand, ponded-Urban land complex, 0 to 1 percent slopes	0.8	0.9
Malabar fine sand-Urban land complex, 0 to 2 percent slopes	4.3	4.9
Myakka fine sand-Urban land complex, 0 to 2 percent slopes	3.3	3.8
Myakka fine sand, ponded-Urban land complex, 0 to 1 percent slopes	0.8	0.9
Orsino fine sand-Urban land complex, 0 to 5 percent slopes	3.2	3.6
Pineda fine sand-Urban land complex, 0 to 2 percent slopes	8.8	10.1
Pompano fine sand-Urban land complex, 0 to 2 percent slopes	0.6	0.6
Pompano fine sand, ponded-Urban land complex, 0 to 1 percent slopes	1.0	1.2
Satellite fine sand-Urban land complex, 0 to 2 percent slopes	2.9	3.3
Valkaria fine sand-Urban land complex, 0 to 2 percent slopes	11.9	13.7
Cocoa fine sand-Urban land complex, 0 to 2 percent slopes	0.3	0.3
Totals	**87.1**	**100**

Satellite fine sand-Urban land complex, 0 to 2% slopes, is the most prevalent soil unit in the Collier County section of the subject property, encompassing 34.6% or 8.4 acres of the subject property.

Table 2C: Collier County – Soil Resource Report

Map Unit Name	Acres in Area of Interest	Percent of Area of Interest (%)
Satellite fine sand, 0 to 2 percent slopes	1.5	6.1
Basinger fine sand-Urban land complex, 0 to 2 percent slopes	4.1	16.9
Holopaw-Basinger-Urban land complex, 0 to 2 percent slopes	2.5	10.1
Immokalee fine sand-Urban land complex, 0 to 2 percent slopes	7.2	29.4
Immokalee-Oldsmar, limestone substratum-Urban land complex, 0 to 2 percent slopes	0.7	2.8
Satellite fine sand-Urban land complex, 0 to 2 percent slopes	8.4	34.6
Totals	**24.3**	**100**

2.2.3 Water Resources

The subject property transects nine Federal Emergency Management Agency panels ([FEMA] Panels 12021C0183J, 12021C0191J, 12071C0583G, 12071C0591H, 12071C0593H, 12071C0656G, 12071C0657G, 12071C0658G, and 12071C0659G; see Appendix F). Based on the length of the subject property, it transects several floodplain designations including Zone X, Zone AE, Zone AH, and Regulatory Floodways associated with several river crossings.

2.2.4 Climate

The climate in Lee and Collier Counties is humid subtropical characterized by mild and relatively dry winters and warm and wet summers. The Gulf of Mexico has a moderating influence on the maximum and minimum temperatures in summer and winter, particularly in coastal areas. Colder winter temperatures are closely tied to the advance of cold fronts emanating from the north. However, this cold continental air must pass over water and much of peninsular Florida. As such, the cold air is appreciably modified during that journey. Summer temperatures are also tempered by the shade provided by the formation of cumulus clouds and rain showers. Based on weather records from Fort Myers, Florida, the normal monthly mean temperature ranges from 63.5 degrees Fahrenheit (°F) in January to 82.8°F in August. The mean annual rainfall is approximately 54 inches with the heaviest rainfall, approximately 60%, occurring during the rainy season which extends from June to September. This is the result of afternoon and evening thunderstorms. Thunderstorms occur about 80 days per year. Tropical storms or depressions and hurricanes are often associated with part of the rainy season. The average relative humidity in mid-afternoon is 50 to 60%. At night, just before dawn, the average relative humidity is about 80% (McCarthy 2014 and 2015).

2.3 Current Use of the Property

Based upon available site history, the subject property is an unused rail line ROW corridor, constructed in the 1920s, and last used in 2008. As indicated in Section 1, fifteen of the subject property parcels are in Lee County (seven in Estero and eight in Bonita Springs) and one parcel in Collier County.

The City of Bonita Springs Community Development indicated that the parcels comprising the subject property in Lee County are designated as ROW, making the zoning category not applicable. Additionally, the City of Bonita Springs Comprehensive Plan, Policy 1.2.16 states: "*The City shall investigate railroad and electric power rights-of-way for their potential inclusion in the system of public bike paths and other ancillary recreational uses. Policies under Objective 1.6 of the Transportation Element describe the potential use of the CSX/Seminole Gulf rail corridor for hiking/biking/walking trail"*.

The Transportation components of the Village of Estero Comprehensive Plan (2018, amended in 2019) has a linkage component stating, "*Estero residents want to feel connected to their community's parks, recreation, and centers of activity. Pathways along roadways, greenways that are away from roadways, and blueways along the Estero River are desired to link residents to these community's assets. Opportunities to link to destinations beyond Estero along the CSX rail corridor and FPL corridor are also important*," and further stating, "*Blueways, bikeways, pedestrian paths and use of the CSX rail corridor and FPL corridor are important and viable alternatives to traditional roadway infrastructure. Estero is committed to identifying and expanding these options where and when feasible.*"

The Collier County parcel has a property use of 91 - Utility, Gas, Electric, telephone, local. The railroad corridor transects the 135-acre Railhead Scrub Preserve. The Railhead Scrub Preserve is an imperiled endemic oak scrub habitat with dense populations of gopher tortoise (*Gopherus polyphemus*), rare plant species, and large mammal populations (e.g., bobcats [*Lynx rufus*], coyotes [*Canis latrans*], and Florida black bear [*Ursus americanus floridanus*]). An additional description of the subject property and the adjacent uses is provided in Section 5.

2.4 Descriptions of Structures, Roads, and Other Improvements on the Site

In 1922, Barron Collier and other Fort Myers businessmen formed the Fort Myers Southern Railway through a joint venture with the Atlantic Coast Line (ACL) to construct a railroad to Naples. ACL reached Bonita Springs on October 8, 1924, and western Naples on January 7, 1927. Seaboard Air Line Railway, ACL's main competitor, had its own track through Fort Myers and constructed a line to Naples on December 7, 1926. ACL completed a line to Marco Island on June 27, 1927.

In 1967, ACL and Seaboard Air Line merged to form the Seaboard Coast Line (SCL). This merger proved beneficial to the region by eliminating the duplication of tracks and stations. However, the age

of railroad passenger service was over, replaced by improved airline service and highways, as well as the formation of Amtrak. In May 1971, SCL ended passenger service in southwest Florida. Further industry consolidation led to the 1980 merger of SCL with the Chessie System and other railroads to form CSX. In November 1987, Seminole Gulf Railway, L.P. (SGLR) acquired 118 miles of CSX track between North Naples and Arcadia, including the subject property, as well as between Oneco (Bradenton) and Sarasota.

SGLR filed a Notice with the Surface Transportation Board on June 26, 2026. SGLR filed a verified notice of exemption under 49 Code of Federal Regulations (CFR) part 1152 subpart F, Exempt Abandonments, to abandon a line of railroad from the northern ROW boundary of Estero Parkway at approximately SGLR Milepost AX 979.39 in the Village of Estero, Lee County, Florida, south through the remainder of Estero, and through the City of Bonita Springs, Lee and Collier Counties, Florida, to the corridor's terminus at the conceptual northern ROW extension of Wiggins Pass Road at approximately SGLR Milepost AX 990.80 (the Line). There are three freight stations on the Line. The Line traverses U.S. Postal Service zip codes 33928, 34134, 34135, and 34110.

SGLR has certified that: (1) no local traffic has moved over the Line since 2008; (2) there is no overhead traffic because the Line is not a through line; (3) no formal complaint filed by a user of rail service on the Line (or by a state or local government on behalf of such user) regarding cessation of service over the Line is pending with either the Surface Transportation Board or any U.S. District Court or has been decided in favor of a complainant within the two-year period prior to the filing of the notice; and (4) the requirements at 49 CFR 1105.7(b) and 1105.8(c) (notice of environmental and historic reports), 49 CFR 1105.12 (newspaper publication), and 49 CFR 1152.50(d)(1) (notice to government agencies) have been met.

Since service terminated in 2008, the railroad is overgrown and the tracks remain on the entire length of the subject property.

2.5 Current Use of Adjoining Properties

The 11.4-mile subject property transects multiple use areas in the Village of Estero, the City of Bonita Springs, and Collier County. The following describes the land or properties within the immediate vicinity of the subject property (see Table 3, and Figures 1, 2A through 2C). The information presented was primarily obtained from the LCPA, CCPA, and Google Earth Pro, and was supplemented by observations made during the July 9, 2026, site reconnaissance.

Table 3: Current Use of Adjoining Properties	
Direction	**Description**
North	The northern terminus of the subject property is Estero Parkway. The rail line extends further north through a residential area.
East	**Estero (northern section)** – Most of the properties east of the subject property through Estero are residential, with many golf course neighborhoods occurring toward the southern portion of the Village. The Village of Estero is located east of the railroad off Corkscrew Road, and Estero High School is east of the railroad off Williams Road. **Bonita Springs (central section)** – The properties east of the subject property in the northern section of Bonita Springs are residential until the railroad crosses Old 41 Road where the eastern properties are predominantly commercial. The "old" commercial section of Bonita Springs is located east of the railroad south of Terry Street. The southern section of Bonita Springs is a golf course neighborhood. **Collier (southern section)** – The northern properties to the east of the railroad in Collier County are commercial/light industrial. Railhead Scrub Preserve borders the railroad to the east in the southern section of Collier County.
South	The southern railroad terminus is at the Railhead Scrub Preserve in Collier County. The Cemex Wiggins Pass North Naples Ready-Mix Concrete Plant is located immediately south of the terminus.
West	**Estero (northern section)** – The properties west of the subject property are residential and commercial along the South Tamiami Trail (US Highway 41) which runs parallel to the railroad in a north-south direction. **Bonita Springs (central section) –** The properties west of the subject property in the northern section of Bonita Springs are commercial until the railroad crosses Old 41 Road where the properties are predominantly residential. Depot Park, immediately south of the Imperial River, was the location of the former railroad depot for passenger service. **Collier (southern section)** – Most of the properties to the west of the subject property within Collier County are commercial/light industrial until the southernmost area which is within Railhead Scrub Preserve in Collier County.

3 User-Provided Information

3.1 Title Records

S&S did not perform a title records search as part of the preparation of this Phase I ESA; however, readily accessible property records from Lee and Collier Counties are provided in Appendix A.

- The subject property is currently owned by Seminole Gulf Railway, L.P., which acquired the property from CSX Transportation, Inc., on November 1, 2018 (Collier County Book 5568, Page 941: see Appendix A).

Additionally, TPL provided a Draft Title Commitment completed by Commonwealth Land Title Insurance Company on February 12, 2026 (see Appendix B). Commonwealth Land Title Insurance Company indicated that the Title is, at the Commitment Date, vested in: Seminole Gulf Railway, L.P., a Delaware limited partnership and as disclosed in the Public Records, has been since November 2, 2018, in Collier County, Florida and November 7, 2018, in Lee County, Florida.

3.2 Environmental Liens or Activity and Use Limitations

S&S tasked Envirosite Corporation (Envirosite) to perform an environmental lien and activity/use limitations (AULs) search (see Appendix G). Envirosite searched records from Lee and Collier Counties back to 1980 in compliance with ASTM E1527-21.

Envirosite did not identify any environmental liens for any of the subject property parcels.

Envirosite identified the following activity/use limitations (AULs) for the subject property parcels

Land Use Restrictions as recited in Quit Claim Deed recorded 11/2/2018 in OR Book 5568 Page 941.

and

Land Use Restrictions as recited in Confirmatory Quit Claim Deed recorded 6/26/2019 in OR Book 5645 Page 3121.

S&S reviewed the most recent deed which has a deed restriction for the parcels that form the subject property:

> *Grantee acknowledges that the Land conveyed hereunder has been historically used for railroad industrial operations and other uses and is being conveyed for use only as industrial, commercial or non-residential property, Grantee, by acceptance of this deed, hereby covenants that it, its successors, heirs, legal representatives or assigns shall not use the Land for any purpose other than industrial or commercial purposes, and that the Land will not be used for (a) any residential purpose of any kind or nature (residential use shall be defined broadly*

to include, without limitation, any use of Land by individuals or families for purposes of personal living, dwelling, or overnight accommodations, whether such uses are in single family residences, apartments, duplexes, or other multiple residential dwellings, trailers, trailer parks, camping sites, motels, hotels, or any other dwelling use of any kind), (b) any public or private school, day care, or any organized long-term or short-term child care of any kind, (c) ***any recreational purpose (recreational use shall be defined broadly to include, without limitation, use as a public park, hiking or biking trail, athletic fields or courts, or public gathering place),*** *(d) any agricultural purpose that results in, or could potentially result in, the human consumption of crops or livestock raised on the property (agricultural purpose shall be defined broadly to include, without limitation, activities such as food crop production, dairy farming, livestock breeding and keeping, and cultivation of grazing land that wou1d ultimately produce, or lead to the production of, a product that could be consumed by a human or (e) establishment of a mitigation bank and/or the sale, lease, license, conveyance or in any way distribution of mitigation credits (collectively the ""Environmental Use Restrictions"). Notwithstanding the foregoing, the above restrictions shall not apply to any uses of the Land pursuant to occupancy agreements with Grantee at the time of conveyance from Grantor to Grantee. By acceptance of this deed, Grantee further covenants that it, its successors, heirs, legal representatives or assigns shall not use the groundwater underneath the Land for human consumption, irrigation or other purposes.*

3.3 Specialized Knowledge

Mr. Robert H. Fay, Executive Vice President, Seminole Gulf Railway, L.P., confirmed that the subject property was historically undeveloped prior to the construction of the railroad in the 1920s. Mr. Fay also stated that there was a deed restriction on the future use (see Appendix H and Section 3.2). Neither the current owner nor the Users, provided any specialized knowledge or information pertaining to the presence of RECs, CRECs, and HRECs in connection with the subject property (see Appendix H).

3.4 Commonly Known or Reasonably Ascertainable Information

Representatives for the current owner did not provide S&S with commonly known or reasonably ascertainable information regarding the presence of RECs, CRECs, and HRECs in connection with the subject property (see Appendix H).

3.5 Valuation Reduction for Environmental Issues

S&S did not perform a valuation reduction for environmental issues as part of this Phase I ESA. According to Mr. Doug Hattaway, Southeast Region Conservation Director, TPL, the purchase price

reflects fair market value. As a rail corridor with historic industrial use, contamination is expected, which can be addressed through a soil management plan with capping. The corridor is inactive and all parties have negotiated a purchase price that will ensure project success for a rail-to-trail conversion to support public use and the local economy.

3.6 Owner, Property Manager, and Occupant Information

According to information obtained from LCPA and CCPA, the subject property is owned by SGLR, who acquired the property from CSX (see Appendix A). The entire 11.4-mile section is currently not in use and mostly overgrown.

3.7 Reason for Performing ESA

This Phase I ESA was performed for TPL, the Village of Estero, City of Bonita Springs, and Collier County to support the acquisition of the unused railway line for trail conversion to support public use and the local economy.

4 Records Review

4.1 History of Railroads in Southwest Florida

In 1885, the Florida Southern Railroad began construction of the first rail line from Arcadia to Punta Gorda. By March 1886, the railbed was finished and the first train operated into Punta Gorda on July 24, 1886. This line was originally built as a **3**-foot narrow gauge. The tracks were widened to standard gauge (4 feet, 8.5 inches) on December 17, 1892.

The extension from Punta Gorda to F**or**t Myers was built by ACL. Construction began shortly after the ACL purchased the Plant System and Florida Southern Railroads in 1903. The first locomotive crossed the Caloosahatchee River on February 2, 1904. Nine days later**,** the tracks reached F**or**t Myers city limits and scheduled passenger services began May 10, 1904.

In 1922, Barron Collier and other F**or**t Myers businessmen formed the Fort Myers Southern Railway as a joint venture with ACL to construct a railroad to Naples. The company reached Bonita Springs on October 8, 1924, and western Naples on January 7, 1927. ACL**'**s main competitor, the Seaboard Air Line Railway**,** which had its own track through F**or**t Myers**,** also constructed a line reaching Naples on December 7, 1926. ACL completed a line to Marco Island on June 27, 1927.

In 1967**,** ACL and Seaboard Air Line merged into one company, SCL which proved beneficial to rail travel within the region by eliminating duplicate tracks and stations. However, the age of railroad passenger service was over**,** replaced by improved airline service and highways as well as the formation of Amtrak. SCL ended passenger service in **s**outhwest Florida in May 1971. In 1980**,** SCL merged with the Chessie System and other railroads to form CSX. In November 1987, SGLR acquired 118 miles of CSX track between North Naples and Arcadia, including the subject property, and between Oneco (Bradenton) and Sarasota.

4.2 Standard Environmental Record Sources

4.2.1 Environmental Database Search Findings

S&S tasked Envirosite to perform a search of reasonably ascertainable government and tribal records. Envirosite conducted a site records search compliant with the requirements of ASTM E1527-21 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" and the USEPA's "Standards and Practices for All Appropriate Inquiries" (40 CFR Part 312), which included searching a prescribed array of federal, state, local, and tribal databases. The purpose of Envirosite's environmental database search was to identify the available (reasonably ascertainable) government and tribal records for mapped facilities/sites either on the subject property or within the prescribed search radius as defined by ASTM. The complete online Envirosite environmental database search is provided in Appendix C. In addition to the search conducted by Envirosite, S&S completed a site search using the FDEP Contamination Locator Map and the FDEP Storage Tanks and Contamination Monitoring Map.

The Envirosite Government Records Report identified approximately 170 environmental sites and/or addresses (including the subject property) within the ASTM-defined radius of the subject property (see Appendix C). Given the large number of sites identified in the ASTM database search, the table detailing these sites is provided in Appendix C. The subject property is located in a mixed-use area of Lee and Collier Counties. The following provides a summary of the current status of those sites with known environmental investigations identified in proximity to the subject property.

- The Corkscrew Energy, LLC site (FDEP Site # 36/9806315) is located at 8800 Corkscrew Road in Estero. In 2011, a limited site assessment report (LSAR) was completed for the 2007 spill bucket discharge. Based on the findings of the LSAR the contractor recommends no further soil or groundwater assessment. On June 17, 2011, FDEP agreed with the recommendation and issued a Site Rehabilitation Completion Order (SRCO). This closed site would have no impact on the subject property.

- Palmer Cablevision of SW Fl Inc (FDEP Site # 36/8627269) is located at 26790 Old 41 Road in Bonita Springs. The Underground Storage Tank (UST) was removed in 1990 and in 1991 soil contamination was detected in the area of the former tank. An SRCO was issued in 1999 and the wells were abandoned in 2011. This closed site would not have any impact on the subject property.

- The Tisch Coin Laundry site (USEPA Resource Conservation and Recovery Act [RCRA] ID No. FLD981859820) is located at 10450 West Terry Street in Bonita Spring, immediately east of the subject property. Tisch Coin Laundry is currently an active laundromat (known as Tisch Laundry and Dry Cleaning), but historically, it also conducted drycleaning operations. Investigations conducted by FDEP and USEPA in 1999 indicated the facility discharged wastewater into two percolation ponds located south of the facility. Subsequent FDEP and USEPA investigations revealed drycleaning solvents had been discharged into the percolation ponds.

  USEPA issued a Consent Agreement and Final Order (Docket No: RCRA-04-2000-12) on June 1, 2001, requiring the submittal of a Closure Plan to adequately assess and remediate the contamination identified on the property. The Closure Plan was received on October 15, 2007. Pursuant to the Closure Plan, the percolation ponds and associated soils were removed from the site. According to a 2024 Compliance Evaluation Inspection conducted by FDEP, approximately 292 tons of hazardous waste soil and 820 tons of non-hazardous waste soil were excavated. Soil removal and subsequent groundwater assessment activities were completed in 2010.

  A Long-Term Groundwater Monitoring Plan (LTGWMP) was approved by FDEP and USEPA in 2012. The LTGWMP consists of biennial sampling of four long-term monitoring wells (LTMWs) in odd years for volatile organic compounds via USEPA Method 8260B. In addition to water quality analyses, water level data is collected for determination of potentiometric groundwater flow direction at the site.

  According to the 2023 Groundwater Monitoring Report, groundwater samples were collected from all four LTMWs on November 17, 2023. Results indicated most of the monitored constituents showed a general decreasing trend since biennial monitoring began in 2013. However, concentrations of daughter products of trichloroethene and/or tetrachloroethene degradation (notably cis-1,2-dichloroethene and vinyl chloride) continue to significantly exceed Florida Groundwater Cleanup Target Levels and Florida Natural

Attenuation Default Concentrations at source area and downgradient wells. The report for the November 2023 groundwater monitoring event recommended continuation of groundwater monitoring with the next event scheduled in November 2025. The 2025 data was not available from the FDEP OCULUS database.

The available site file indicates that USEPA attempted to gain access to the railroad in 2013 to install temporary monitoring wells on the railroad ROW to further delineate groundwater contamination to the west. Site access was declined and the monitoring wells were never installed. S&S contacted the USEPA Region IV site manager, Mr. Brian Bastek, to obtain the most recent information pertaining to the Tisch site. Mr. Bastek could not provide any additional information but commented that he did not believe there would be chlorinated solvent source on the railroad ROW. He did state that groundwater beneath the railroad ROW could be contaminated with drycleaning solvents attributable to the Tisch Laundry site.

The Bonita Springs Fire Control & Rescue (FDEP Site # 36/8627258) is located at 27490 Old 41 Road in Bonita Springs. After remedial and assessment activities were completed, FDEP issued an SRCO in October 2020 for the 1993 petroleum discharge at this site. This site would not have any impact on the subject property.

- The Naples Tomato Growers site (FDEP Site # 11/8518313) is located at 15000 Old 41N in Collier County. Review of the available site file indicates that a discharge reporting form was submitted to FDEP in 1990. The site received a No Further Action Order on May 10, 1991. This closed site would not have any impact on the subject property.

- The Cemex-Wiggin Pass Ready-Mix, Block and Paver site (FDEP Site # 11/8518892) is located at 1425 Wiggins Pass Road East. A Site Assessment Report (SAR) and No Further Action Proposal (NFAP) was submitted to FDEP in May 2016 for the 1992 and 1993 discharges. FDEP reviewed the SAR/NFAP request and issued an SRCO on February 24, 2017. This closed site would not have any impact on the subject property.

S&S reviewed the location and the current regulatory status of the sites listed in the Envirosite database search (see Appendix C). It is noted that many of the listed sites store or use hazardous materials or petroleum products. However, except for Tisch Laundry, it is our opinion that the sites listed in the Environmental Database Search table and described above would not have a likely impact on the subject property.

4.2.2 Contaminants of Emerging Concern

According to the USEPA, Contaminants of Emerging Concern are increasingly being detected at low levels in ground and surface water. There is concern that these compounds may have an impact on human health and the environment. On July 8, 2024, the USEPA designated two polyfluoroalkyl substances (PFAS)—perfluorooctanoic acid and perfluorooctane sulfonic acid, including their salts and structural isomers—as "hazardous substances" under CERCLA.

Envirosite conducted a search of the publicly available PFAS databases, identifying six facilities in the PFAS Industry database, which are sites where regulators and the public have expressed interest in knowing which regulated entities may be using PFAS (see Appendix C). These facilities include Goodcat LLC, Earth Supplied Products LLC, Etura Corp., MOOG, Inc., March Performance, Inc., and Bonita Springs Utilities

Wastewater Treatment Plant (WWTP)/Water Reclamation Facility. None of these facilities are listed on the FDEP Environmental Restoration Integrated Cleanup (ERIC) PFAS database indicating any ongoing investigative activities. Additionally, the subject property transects several areas of commercial/light industrial facilities that are likely to use materials containing PFAS.

4.2.3 Unmappable Sites

Unmappable orphan sites are sites with poor or inadequate address information that cannot be mapped. The Envirosite search did not identify any unmappable sites.

4.3 Physical Setting Sources

The most recent topographic data were obtained from the Environmental Systems Research Institute, United States Geological Survey (USGS), and the Envirosite government records report (Appendix C). Historical topographic maps are provided in Appendix D.

4.4 Historical Use Information

S&S reviewed the following historical sources to develop a history of the previous uses of the subject property and surrounding area to assist with identifying the past uses for indications of RECs. S&S tasked Envirosite to perform a search of reasonably available historical USGS topographic maps, historical aerial photographs, and historical fire insurance maps. These maps and photos were reviewed to evaluate land development and obtain information concerning the history of development on and near the subject property. Reviewed historical topographic maps, aerial photographs, and Sanborn Maps are summarized below.

4.4.1 Aerial Photographs from 1944 through 2023

Historical aerial photographs from 1944 through 2023 from Envirosite's Historical Aerial Photo Report (Appendix I) were reviewed to identify historical uses on the subject property and the surrounding area. The findings of the historical aerial review are summarized in Table 4.

Table 4: Aerial Photographs

Direction	Comments
Subject Property	The subject property appears as a rail ROW in all reviewed historical aerial photographs (1944–2023). Due to the extent of the historical aerial photographs, it is difficult to discern years of operation.

Table 4: Aerial Photographs	
Direction	Comments
North	**Estero (northern section)** – The areas north of the subject property are mostly out of the extent of all reviewed historical aerial photographs (1944–2023). From what is visible, this area appears mostly undeveloped until the 1999 historical aerial photograph, which showed a roadway traveling west to east, and the 2007 historical aerial photograph, which showed single-family residential development. **Bonita Springs (central section)** – In all reviewed historical aerial photographs (1944–2023), the areas north of the subject property within this segment are a continuation of the rail line ROW corridor. Due to the extent of the historical aerial photographs, it is difficult to discern years of operation. **Collier County (southern section)** - In all reviewed historical aerial photographs (1944–2023) the areas north of the subject property within this segment are the continuation of the rail line ROW corridor. Due to the extent of the historical aerial photographs, it is difficult to discern years of operation.
East	**Estero (northern section)** – Earliest historical aerial photographs (1944–1950) show areas east of the subject property as primarily undeveloped with wetlands visible. Only a small portion along the Estero River is developed, likely for agricultural purposes with a grid pattern observed. In the 1958 historical aerial photograph, an expansion of agricultural land is observed in the northern portion with row crops visible and a reduction in canopy cover within the southern portion. In the 1969 historical aerial photograph, sparse residential development is observed and by the 1978 historical aerial photograph, another expansion of agricultural land is along the northern boundary of the subject property. By the 1995 historical aerial photograph, there is a large increase in development within the northern portion, with single-family residential development surrounding what appears to be manmade ponds. Residential development is observed in the southern portion within the 1999 historical aerial photograph and by the 2007 historical aerial photograph this appears as a golf course surrounded by single-family homes and numerous ponds likely for stormwater retention. The northern area is also dominated by high-density single-family residential development with ponds, likely for stormwater retention, by the 2007 historical aerial photograph. No other significant changes are observed in all other historical aerial photographs (2010–2023) reviewed. **Bonita Springs (central section)** – The earliest historical aerial photographs (1944–1950) depict the areas east of the subject property as mainly undeveloped with wetlands visible. A small portion in the middle of this segment is slightly developed along a grid network of streets. Imperial River is also visible running east to west. While the northern portion remains largely undeveloped with some minimal road development from the 1958 to 1978 historical aerial photographs, the middle to southern portion continues to grow along a grid network with agriculture visible on the outer extents beginning on the 1969 historical aerial photograph. The 1971 to 2015 historical aerial photographs show primarily residential development continuing to gradually increase into a high-density residential area. No other significant changes are observed in all other reviewed historical aerial photographs (2019–2023). **Collier County (southern section)** – The areas east of the subject property remain largely undeveloped in the earliest historical aerial photographs (1944–1958) with Old 41 Road extending northeast of the subject property and continuing southwest. In the 1969 historical aerial photograph, minimal development is depicted with land being used primarily for agricultural purposes further east. Beginning in the 1978 historical aerial photograph, more development occurs with the construction of a golf course and continues to grow through the 1980 historical aerial photograph. By the 1995 historical aerial photograph there appears to be some development directly adjacent to the subject property which can be discerned as being for commercial use in the 1999 historical aerial photograph. No agricultural land exists within the 2007 historical aerial photograph; rather, this land is dominated by golf courses surrounded by single-family residences. No other significant changes are observed in all other reviewed historical aerial photographs (2010–2023).

Table 4: Aerial Photographs	
Direction	Comments
South	**Estero (northern section) –** In all reviewed historical aerial photographs (1944–2023), the areas south of the subject property within this segment are the continuation of the rail line ROW corridor. Due to the extent of the historical aerial photographs, it is difficult to discern years of operation. **Bonita Springs (central section)** – In all reviewed historical aerial photographs (1944–2023), the areas south of the subject property in this segment are the continuation of the rail line ROW corridor. Due to the extent of the historical aerial photographs, it is difficult to discern years of operation. **Collier County (southern section)** – Areas south of the subject property appear undeveloped in the earliest historical aerial photographs (1944–1958) until the 1969 historical aerial photograph when what appears to be a single-family residential neighborhood is being developed southeast of the subject property. Gradual growth continues until the 1995 historical aerial photograph when a substantial growth in development can be seen south of the subject property becoming a high-density residential area. No other significant changes are observed in all other reviewed historical aerial photographs (1999–2023) as areas south of the subject property remain residential.
West	**Estero (northern section) –** In the earliest historical aerial photographs (1944–1950), areas west of the subject property appear mostly undeveloped with some agricultural land. Estero River is visible running east to west near the northern portion of the subject property. South Tamiami Trail is also visible in the northern portion and appears to expand to the southern portion by the 1958 historical aerial photograph. Beginning in the 1969 historical aerial photograph, residential development is observed in the northern portion which appears to develop gradually until the 1995 historical aerial photograph when a significant increase in development is observed. Large agricultural properties remain in the 1999 historical aerial photograph along the subject property's boundary in the northern portion with areas west of South Tamiami Trail being further developed with what appears to be manmade ponds. By the 2007 historical aerial photograph, single-family residential development is depicted surrounding these ponds along with a large commercial development along the boundary of the subject property's southern portion. No other significant changes are observed in all later reviewed historical aerial photographs (2010–2023) with residential and commercial development remaining the prominent use west of the subject property. **Bonita Springs (central section)** – The areas west of the subject property appear as largely undeveloped with wetlands and only a few unimproved roads visible in the earliest historical aerial photographs (1944–1950). In the 1958 historical aerial photograph, South Tamiami Trail is visible extending north to south. Portions of land being used for agricultural purposes are depicted too. Portions of these are visible as row crops in the 1969 historical aerial photograph. Beginning with the 1969 historical aerial photograph, development expands near the central portion of this segment. Development, particularly residential, continues to gradually expand until the 2007 historical aerial photograph with what appears to be manmade ponds and golf courses. The northern portion of this segment experiences a significant increase in residential development by the 1995 historical aerial photograph and continues to grow through the 2007 historical aerial photograph. No other significant changes are observed in all later reviewed historical aerial photographs (2010–2023). **Collier County (southern section)** - The areas west of the subject property remain largely undeveloped in the earliest historical aerial photographs (1944–1958) with Old 41 Road extending from the northeast and continuing southwest. In the 1969 historical aerial photograph, there is development along the subject property's western boundary. This development appears to expand by the 1978 historical aerial photograph and what appears to be high-density residential development begins just west of the subject property's southern boundary. This residential development continues to expand through the 1995 historical aerial photograph. Commercial development near the subject property's western boundary appears to increase through the 1999 historical aerial photograph. No other significant changes are observed in all later reviewed historical aerial photographs (2010–2023).

None of the available historical aerial photographs identified additional sites or sources of concern that were not identified in other historical resources.

4.3.2 Topographic Maps from 1958 through 2025

Topographic data from 1958 through 2025 were obtained from Envirosite's "Historical Topographic Map Report" (Appendix D). The findings of the historical topographic map review are summarized in Table 5.

Table 5: Topographic Maps

Direction	Comments
Subject Property	The subject property appears as an active railroad ROW in the earliest historical topographic maps (1958–1958, revised 1972); the available topographic maps do not show specifically when operations ceased, however it appears they have by the 1958, revised 1987, interlocal topographic map. The subject property is depicted as the Atlantic Coast Line and then the Seaboard Coast Line.
North	**Estero (northern section) –** The area north of the subject property appears mostly undeveloped in the 1958 historical topographic map with what appears to be the beginning of a neighborhood, with only a few structures depicted, slightly north of the subject property. Several lakes are visible within this area, including Pine Lake, Cedar Lake, Spruce Lake, Rose Apple Lake, and Lily Lake. There is only a slight increase in homes visible in the 1958, revised 1972, historical topographic map, however, by the 1958, revised 1987, historical topographic maps an expansive residential area appears to be located between Alico Road and the subject property. This area appears highly developed by the 2012 historical topographic map with San Carlos Park, Three Oaks, and Miromar Lakes identified, in addition to several golf courses. In the 2015 historical topographic map, Florida Gulf Coast University is depicted northeast of the subject property. Despite extensive development, the 2025 historical topographic map depicts some remaining marshes directly north of the subject property. What appears to have been a northern continuation of the subject property, when in operation, is labeled as the Atlantic Coast Line in the 1958 historical topographic map, the Seaboard Coast Line in the 1958, revised 1972, historical topographic map, and by the 1958, revised 1987, historical topographic map, it remains present but no longer labeled. **Bonita Springs (central section)** – The area north of this portion of the subject property is a continuation of the subject property in Estero. It is labeled as the Atlantic Coast Line in the 1958 historical topographic map, the Seaboard Coast Line in the 1958, revised 1972, historical topographic map. By the 1958, revised 1987, historical topographic map, it remains present but no longer labeled. **Collier County (southern section)** – The area north of this portion of the subject property is a continuation of the subject property in Bonita Springs. It is labeled as the Atlantic Coast Line in the 1958 historical topographic map, the Seaboard Coast Line in the 1958, revised 1972, historical topographic map, and by the 1958, revised 1987, historical topographic map, it remains present but no longer labeled.

Table 5: Topographic Maps	
Direction	Comments
East	**Estero (northern portion) –** In the earliest historical topographic maps (1958–1958, revised 1972) the areas directly east of the subject property are depicted as an orchard with numerous flowing wells and a gravel pit. Further east appears undeveloped and highly vegetated with some marshlands. In the 1958, revised 1987, historical topographic map, there appears to be some development proximate to the subject property. Interstate 75 (I-75) is also visible, running north to south. Areas east of I-75 appear to begin experiencing some residential development. By the 2012 historical topographic map, the area east of the subject property appears densely developed with mostly residential and scattered commercial uses along I-75. While a high density of development remains, the 2025 historical topographic map depicts some marshes remaining along I-75 and comprising most of Florida Gulf Coast University which is slightly northeast of the subject property. **Bonita Springs (central portion) –** The area east of the subject property appears primarily undeveloped in the earliest historical topographic map (1958) except in the central portion of this segment within Bonita Springs which has incurred some development along a grid network. Undeveloped areas are depicted as highly vegetated with sporadic marshes. Imperial River is visible extending east to west and a tributary, Leitner Creek, is visible extending further eastward. Scattered flowing wells, a racetrack, and a cemetery are depicted east of the subject property. In the 1958, revised 1972, historical topographic map, roads begin to expand while development is depicted to increase within Bonita Springs. By the 1958, revised 1987, historic topographic map, development begins to expand into areas outside Bonita Springs, scattered both to the northeast and southeast of the subject property. Bonita Springs appears to have a high density of buildings. By the 2012 historical topographic map, the areas east of the subject property appear to have a high-density of residential development and a large amount of local roads. I-75 is shown extending north to south with areas further east remaining undeveloped and highly vegetated and containing small bodies of water. No other significant changes are observed in the remaining historical topographic maps (2015–2025). **Collier County (southern portion)** – In the earliest historical topographic map (1958), the area east of the subject property is undeveloped, highly vegetated with patches of marsh present. Some development is observed beginning in the 1958, revised 1972, historical topographic map with a trailer park depicted adjacent to the subject property and other areas further east appearing to undergo development. However, it remains highly vegetated. The 1958, revised 1987, historical topographic map continues to show large areas undeveloped with high vegetation. More development is occurring along the subject property's boundary and what appears to be the start of a neighborhood is observed slightly east. By the 2012 historical topographic map, the areas east of the subject property appear to be dominated by residential development with small waterbodies. Two schools are depicted off Livingston Road in the 2015 historical topographic map. While this area appears to have a high density of residential development, the 2025 historical topographic map continues to show some scattered marsh areas.

Table 5: Topographic Maps	
Direction	Comments
South	**Estero (northern section) –** The area south of this portion of the subject property is a continuation of the subject property in Bonita Springs. It is labeled as the Atlantic Coast Line in the 1958 historical topographic map, the Seaboard Coast Line in the 1958, revised 1972, historical topographic map, and by the 1958, revised 1987, historical topographic map, it remains present but no longer labeled. **Bonita Springs (central section)** – The area south of this portion of the subject property is a continuation of the subject property in Collier County. It is labeled as the Atlantic Coast Line in the 1958 historical topographic map, the Seaboard Coast Line in the 1958, revised 1972, historical topographic map, and by the 1958, revised 1987, historical topographic map, it remains present but no longer labeled. **Collier County (southern section)** – Areas south of the subject property are largely undeveloped with a few scattered buildings along the Cocohatchee River in the earliest historical topographic map (1958). An increase in development is observed in the 1958, revised 1972, historical topographic map with Palm River Estates depicted. This area appears to include a future golf course. New development is also observed southwest of the subject property, specifically along the Cocohatchee River. By the 1958, revised 1987, historical topographic map, a couple of golf courses are visible coupled with an increase in the number of houses depicted within Palm River Estates. Areas south of the subject property appear to be highly developed residential by the 2012 historical topographic map. No significant changes were observed in the remaining historical topographic maps (2015–2025). An apparent southern continuation of the subject property, when in operation, is labeled as the Atlantic Coast Line in the 1958 historical topographic map, the Seaboard Coast Line in the 1958, revised 1972, historical topographic map, and Old Railroad Gauge by the 1958, revised 1987, historical topographic map. By the 2012 historical topographic map, the rail line is no longer depicted.
West	**Estero (northern section) –** The area west of the subject property is mostly undeveloped in the earliest historical topographic map (1958) with some orchards present just west of the subject property. U.S. Highway 41 (South Tamiami Trail) is visible extending north to south, and Estero River is visible extending west to east. Koreshan Unity Cemetery is also depicted just west of U.S. Highway 41. There is a slight increase in development along U.S. Highway 41 in the 1958, revised 1972, historical topographic map, however, large portions remain undeveloped. Another increase in development is observed in 1958, revised 1987, historical topographic map but the orchards remain present. Several trailer parks and Koreshan State Park are located within the vicinity. By the 2012 historical topographic map, a large increase in residential development occurs with minimal open space left. However, despite these high-density residential areas, the 2025 historical topographic map depicts some marsh areas remaining around Estero River. **Bonita Springs (central section) –** The area west of the subject property appear primarily undeveloped in the earliest historical topographic map (1958) with some development near Bonita Springs and along Imperial River, further west. Marshes are also present. In the 1958, revised 1972, historical topographic map, there is an expansion of development, particularly along Little Hickory Bay and in the 1958, revised 1987, historical topographic map, development appears to expand westward from Bonita Springs. Bonita Shores, which is located further west between Little Hickory Bay and Imperial River, has also grown. By the 2012 historical topographic map, the area west of the subject property is dominated by residential development with little open space and vegetation depicted. Many roads branch off U.S. Highway 41 (South Tamiami Trail) and Bonita Beach Road which appear to lead to neighborhoods surrounding small waterbodies. No other significant changes are observed in the remaining historical topographic maps (2015–2025). **Collier County (southern section)** – The area west of the subject property is undeveloped with large portions of mangroves depicted in the 1958 historical topographic map. A small sandy area is also visible before Wiggins Pass and U.S. Highway 41 (South Tamiami Trail) west of the subject property with a few unimproved roads. Minimal development is observed in the 1958, revised 1972, historical topographic map with a few buildings present along the western boundary of the subject property off U.S. Highway 41 (South Tamiami Trail). Additional development is observed along the

Table 5: Topographic Maps	
Direction	Comments
	subject property in the 1958, revised 1987, subject property; however, large portions remain undeveloped. Further west, Barefoot Beach State Preserve and Delnor-Wiggins Pass State Recreation Area are depicted which appear to comprise mostly mangroves. By the 2012 historical topographic map, a large increase in development is visible with a large residential area along Vanderbilt Drive, just south of the boundary of Lee and Collier Counties. Wiggins Island, Wiggins Pass Marina, and Gulf Harbor are new areas depicted west of the subject property. While these areas appear to have a high density of residential areas, the 2025 historical topographic map depicts some remaining scattered marsh areas.

None of the available topographic maps identified additional sites or sources of concern that were not identified in other historical resources.

4.4 Fire Insurance Maps

Envirosite searched the Historical Information Gatherers, Inc. Historical Map Collection and the United States Library of Congress Map Collection for fire insurance maps (FIMs), real estate atlases, and similar maps for the site location and adjoining properties. No FIMs or similar maps were identified for the site location and/or adjoining properties.

4.5 Other Information

4.5.1 Land Use Records Review

The subject property is an unused rail line ROW. According to available site information, the land was undeveloped prior to railroad construction in the 1920s. The railroad operated until 2008.

4.5.2 City Directories

Based on the size of the subject property and the number of roadways in the search area, S&S did not conduct a City Directory Search as part of this Phase I ESA.

4.5.3 Building Department Records

No building department records were reviewed while conducting this Phase I ESA. According to the available historical records, the railroad was constructed in the 1920s and operated until 2008.

4.5.4 Well Information

Records from the Envirosite database search of federal USGS wells, Federal Reporting Database System Public Water Supply wells, and the State Database indicate that no permitted wells are located on the subject property (see Appendix C). Numerous permitted wells are within the vicinity of the subject property, including several public supply wells within 0.5 mile of the subject property.

- Manna Christian Missions, Inc./Manna Christian/Ed Saldivar-Saldivar/Manna Christian Water Treatment Plant is located at 10421 Pennsylvania Avenue in Bonita Springs,

approximately 0.21 mile east of the subject property. The well is currently inactive but formerly served a population of 499.

- Gulf Coast Camping Resort is located at 24020 Production Circle in Bonita Springs, approximately 0.077 mile west of the subject property. The well is currently inactive but formerly served a population of 450.

- Cemex - Wiggins Pass Ready-Mix, Block and Paver plant is located at 1425 Wiggins Pass Road E, approximately 0.113 mile south of the subject property. This well is listed as active, serving a worker population of 160.

- Bonita Springs Child Care Center is located at 27624 Felts Avenue, approximately 0.131 mile east of the subject property. The well is currently inactive but formerly served a population of 37.

- Naples Tomato Growers is located at 15000 Old 41 North, approximately 0.142 mile west of the subject property. The well is currently inactive but formerly served a population of 30.

- Estero River Trailer Park is located at 20950 US 41 South, approximately 0.248 mile west of the subject property. The well is currently inactive but formerly served a population of 80.

- Sunny Grove Park, a mobile home community, is located at 3401 Coralberry Lane, approximately 0.263 mile west of the subject property. The well is currently inactive but formerly served a population of 195.

- Estero Woods Village, an apartment community, is located at 22700 Tamiami Trail South, approximately 0.456 mile west of the subject property. The two wells on the property are inactive but formerly served a population of 300.

- Pelican Landing Community Center is located at 24501 Walden Center Drive, approximately 0.459 mile west of the subject property. This well is listed as active serving a population of 600.

5 Site Reconnaissance

5.1 Methodology and Limiting Conditions

S&S conducted a site visit on July 9, 2026, that included the following:

- A site reconnaissance of the subject property; and
- A windshield survey of the adjacent properties and key properties identified in the Envirosite database search.

The site reconnaissance consisted of a visual review of the subject property, windshield surveys of the properties immediately adjacent, and windshield surveys of Envirosite database sites. The subject property reconnaissance was conducted in a systematic method to identify any areas that could be RECs.

Site photographs of general site conditions taken during the site reconnaissance are provided in Appendix K. Locational data were collected using a Trimble Juno T41 and Garmin GPSMap 64st global positioning system.

Additionally, details about interviews that were conducted and related questionnaires are provided in Section 6 of this report.

Mr. Richard Stephens, the S&S Qualified Environmental Professional (QEP) and Mr. Chris Kennedy, S&S Scientist, completed the site reconnaissance on July 9, 2026. The qualification statement and resume for the S&S QEP are provided in Section 12 and Appendix L, respectively.

5.2 General Site Conditions

The subject property is an approximately 11.4-mile, unused railroad ROW beginning immediately south of Estero Parkway in Lee County extending south to Railhead Scrub Preserve in Collier County. Aerial photographs illustrating site features are provided as Figures 2A, 2B, and 2C, and relevant photographs are provided in Appendix K.

According to the available site file and history, the subject property was developed as a railway line in the 1920s and operated for nearly 100 years. The rail line is no longer in operation, closing in 2008.

5.3 Exterior Observations

The following is a summary of key features and potential RECs, HRECs, or CRECs, if any, identified during the site reconnaissance and report development (see Figure 2). The S&S QEP walked the entire subject property.

Estero:

- The subject property is an overgrown abandoned railroad ROW that extends south from Estero Parkway in the Village of Estero. A pile of railroad ties was observed, likely staged by SGLR for routine maintenance.
- A gopher tortoise burrow was observed in the ROW close to the intersection of Williams Road.
- One water crossing exists where the ROW crosses the Estero River.

Bonita Springs:

- Tisch Laundry, a former drycleaner under long-term monitoring with USEPA, is located immediately east of the subject property on Terry Street. More information pertaining to the current status of Tisch Landry is provided in Section 4.2.
- A large pile of railroad ties was observed in the central section of this segment.
- Two homeless encampments and a significant trash pile were observed south of Bonita Beach Road SE (County Road 865) in this segment of the subject property. Although unsightly, we did not observe any issues or concerns pertaining to hazardous materials or wastes.
- Six (6) gopher tortoise burrows were observed in the ROW, most in the central area of the ROW within Bonita Springs and to the north of Terry Street. The other gopher tortoise burrow was observed close to the railroad crossing of Old 41 Road.

Collier County:

- A homeless encampment and a pile of pallets were observed near the intersection with Channel 30 Drive in the northern section of this segment. Additionally, we observed a couch and several tires.
- A trash pile was observed in the central area of this segment which contained household construction trash (e.g., concrete block, wall tiles) and other household items including a piano/organ keyboard.
- Six (6) gopher tortoise burrows were observed in the southern area of this segment where the ROW transects the Railhead Scrub Preserve.

5.4 Interior Observations

There are no permanent structures on the ROW requiring internal observations.

Table 6 provides a summary of the photographs taken during the site visit, their locational data, and a brief description. Photographs are presented in Appendix K.

Table 6: Findings and Additional Points

5.5 Windshield Survey

During the site reconnaissance, S&S conducted a windshield survey of the adjacent parcels (Figures 2A [Estero - North Section], 2B [Bonita Springs - Central Section], and 2C [Collier County - South Section]).

Given that the subject property is located within a commercial and historically industrial area of the Village of Estero, Bonita Springs, and Collier County, it is likely that many of these adjacent properties stored and used hazardous wastes and materials above *de minimis* quantities. However, other than those sites discussed in Sections 4.2 and 7, S&S did not observe any adjacent sites that have potentially impacted the subject property.

6 Interviews

Completed questionnaires used to conduct interviews are provided in Appendix H.

6.1 Interviews with Owners/Operators

Mr. Robert H. Fay, Executive Vice President, Seminole Gulf Railway, L.P., completed the owner/agent questionnaire (Appendix H). Mr. Fay did not identify any issues or concerns pertaining to RECs, HRECs, or CRECs in connection with the subject property. Mr. Fay stated that there was a deed restriction on the subject property's future use (see Section 3.2).

6.2 Interviews with Future Owners

S&S provided TPL, the Village of Estero, the City of Bonita Springs, and Collier County with the User questionnaire (see Appendix H). The following individuals completed the User questionnaires.

Doug Hattaway, Southeast Region Conservation Director, Trust for Public Land - did not identify any RECs or HRECs associated with the subject property. Mr. Hattaway indicated that the purchase price did reflect fair market value. He further stated that he was aware of a publicly recorded deed of title to Seminole Gulf Railway, L.P., that includes deed restrictive language pertaining to land uses.

Steve Sarkozy, Village Manager, Village of Estero - did not identify any RECs or HRECs associated with the subject property.

Matt Feeney, Assistant City Manager, City of Bonita Springs - did not identify any RECs or HRECs associated with the subject property.

Jennifer A. Belpedio, Manager - Real Property Management, Collier County - did not identify any RECs or HRECs associated with the subject property.

6.3 Interviews with Government Officials

S&S completed a records request from Lee County (Request Number #26-2465) and received the following responses. Lee County Pollution Prevention Program and Lee County Tanks Program did not have any records on file for the subject property.

Mr. Brian Bastek, USEPA Region IV Science and Ecosystem Support Division (SESD) – was contacted to obtain information regarding the adjacent Tisch Coin Laundry, 10450 West Terry Street (USEPA # FLD981859820; see Section 4.2). Mr. Bastek stated that USEPA had not sampled on the railroad ROW and that based on the known site history and waste stream he did not think that soils on the ROW would be impacted by the former drycleaner. However, he did state that groundwater beneath the ROW could be impacted as that is a data gap in the USEPA investigations.

6.4 Interviews with Others

S&S did not interview any others in the preparation of this Phase I ESA.

7 Findings

This Phase I ESA of the subject property was performed in general conformance with ASTM E1527-21 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process." On December 15, 2022, the USEPA published a Final Rule adopting ASTM E1527-21 as a standard satisfying the AAI requirement for landowner liability defenses under the CERCLA.

S&S representatives Richard Stephens, the QEP for this Phase I ESA, and Mr. Chris Keneedy, S&S Scientist, conducted the site reconnaissance on July 9, 2026.

The subject property is an approximately 11.4-mile, unused railroad ROW beginning immediately south of Estero Parkway and extending south to Railhead Scrub Preserve in Collier County (see Figures 1, 2A, 2B, and 2C). According to information obtained from the LCPA and CCPA, the subject property is comprised of sixteen parcels (see Section 1 and Appendix A). The center of the subject property has an approximate latitude and longitude of 26.370759N and - 81.802379W in Sections 02, 03, 10, 15, 22, 26, 27, 28, 33 and 35; Townships 46, 47, and 48 South, Range 25 East.

Findings are summarized in the following subsection. Complete details are not discussed in this section alone; the report must be read in its entirety for a comprehensive understanding of the items contained herein.

General Findings

A site map showing the general findings of the site reconnaissance is provided as Figure 2. A photographic log of site features is presented in Appendix K.

- The subject property was first developed as a railroad corridor in the 1920s. Residual contamination from former railroad operations may exist at the subject property. Some historic railroad operations involved the use of chemicals that may have resulted in the presence of contamination today. The most commonly reported contamination along rail lines includes metals, pesticides (such as lead arsenate), and constituents of oil or fuel (petroleum products). These chemicals have been associated with normal railroad operations and are likely to be found anywhere along the corridor. For example, it would not be uncommon to find arsenic present in the soil along a ROW from old railroad ties dipped in an arsenic solution, arsenic weed-control sprays, and arsenic-laced slag used as railroad bed fill. Lubricating oil and diesel that dripped from the trains are likely sources of the petroleum product found along the lines. Other sources of contaminants associated with historic railroad operation may include coal ash from engines, creosote from ties, and PAHs from the diesel exhaust (Commonwealth of Massachusetts 2016). The potential presence of heavy metals (arsenic and lead) and PAHs should be considered an REC.

- The Tisch Laundry site (USEPA # FLD981859820; see Section 4.2) is located immediately adjacent to the subject property on West Terry Street in Bonita Springs. Tisch Laundry is under long-term monitoring for groundwater contamination. Based on the site file review and discussion with the USEPA project manager, groundwater beneath the railroad ROW

may be impacted by chlorinated drycleaning solvents. The potential presence of contamination in the shallow groundwater beneath the subject should be considered a REC.

8 Data Gaps

ASTM E1527-21 defines a data gap as "a lack or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information." A significant data gap is further defined as "a data gap that affects the ability of the environmental professional to identify a recognized environmental condition." Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to the site reconnaissance and interviews. The standard allows the environmental professional to use professional experience to assess the significance of the data gap.

S&S did not conduct a City Directories search for this Phase I ESA. S&S believes that the City Directories cannot be practically reviewed given the size of the project and the large number of potential cross streets and adjacent streets. However, based upon known site history and the review of other historical data sources, we do not believe this is a significant data gap.

9 Conclusions and Opinions

S&S has performed a Phase I ESA of the subject property in general conformance with the scope and limitations of ASTM E1527-21 and the USEPA AAI. Exceptions to, or deletions from, this practice are described in Sections 1.2 and 1.3. The subject property is a 11.4-mile, unused railroad ROW that begins immediately south of Estero Parkway in the Village of Estero, extends south through the City of Bonita Springs, and then terminates at the southern end of the Railhead Scrub Preserve in Collier County (see Figures 1, 2A, 2B, and 2C). This assessment has revealed the following RECs in connection with the subject property.

- The subject property has been a railroad ROW since the 1920s and, as such, the soils along the ROW may have been impacted by railroad operations.
- Tisch Laundry, and site, under long-term monitoring and the available site information suggests that groundwater beneath the subject property maybe impacted with drycleaning solvents.

It is our opinion that a Phase II ESA is warranted for this subject property.

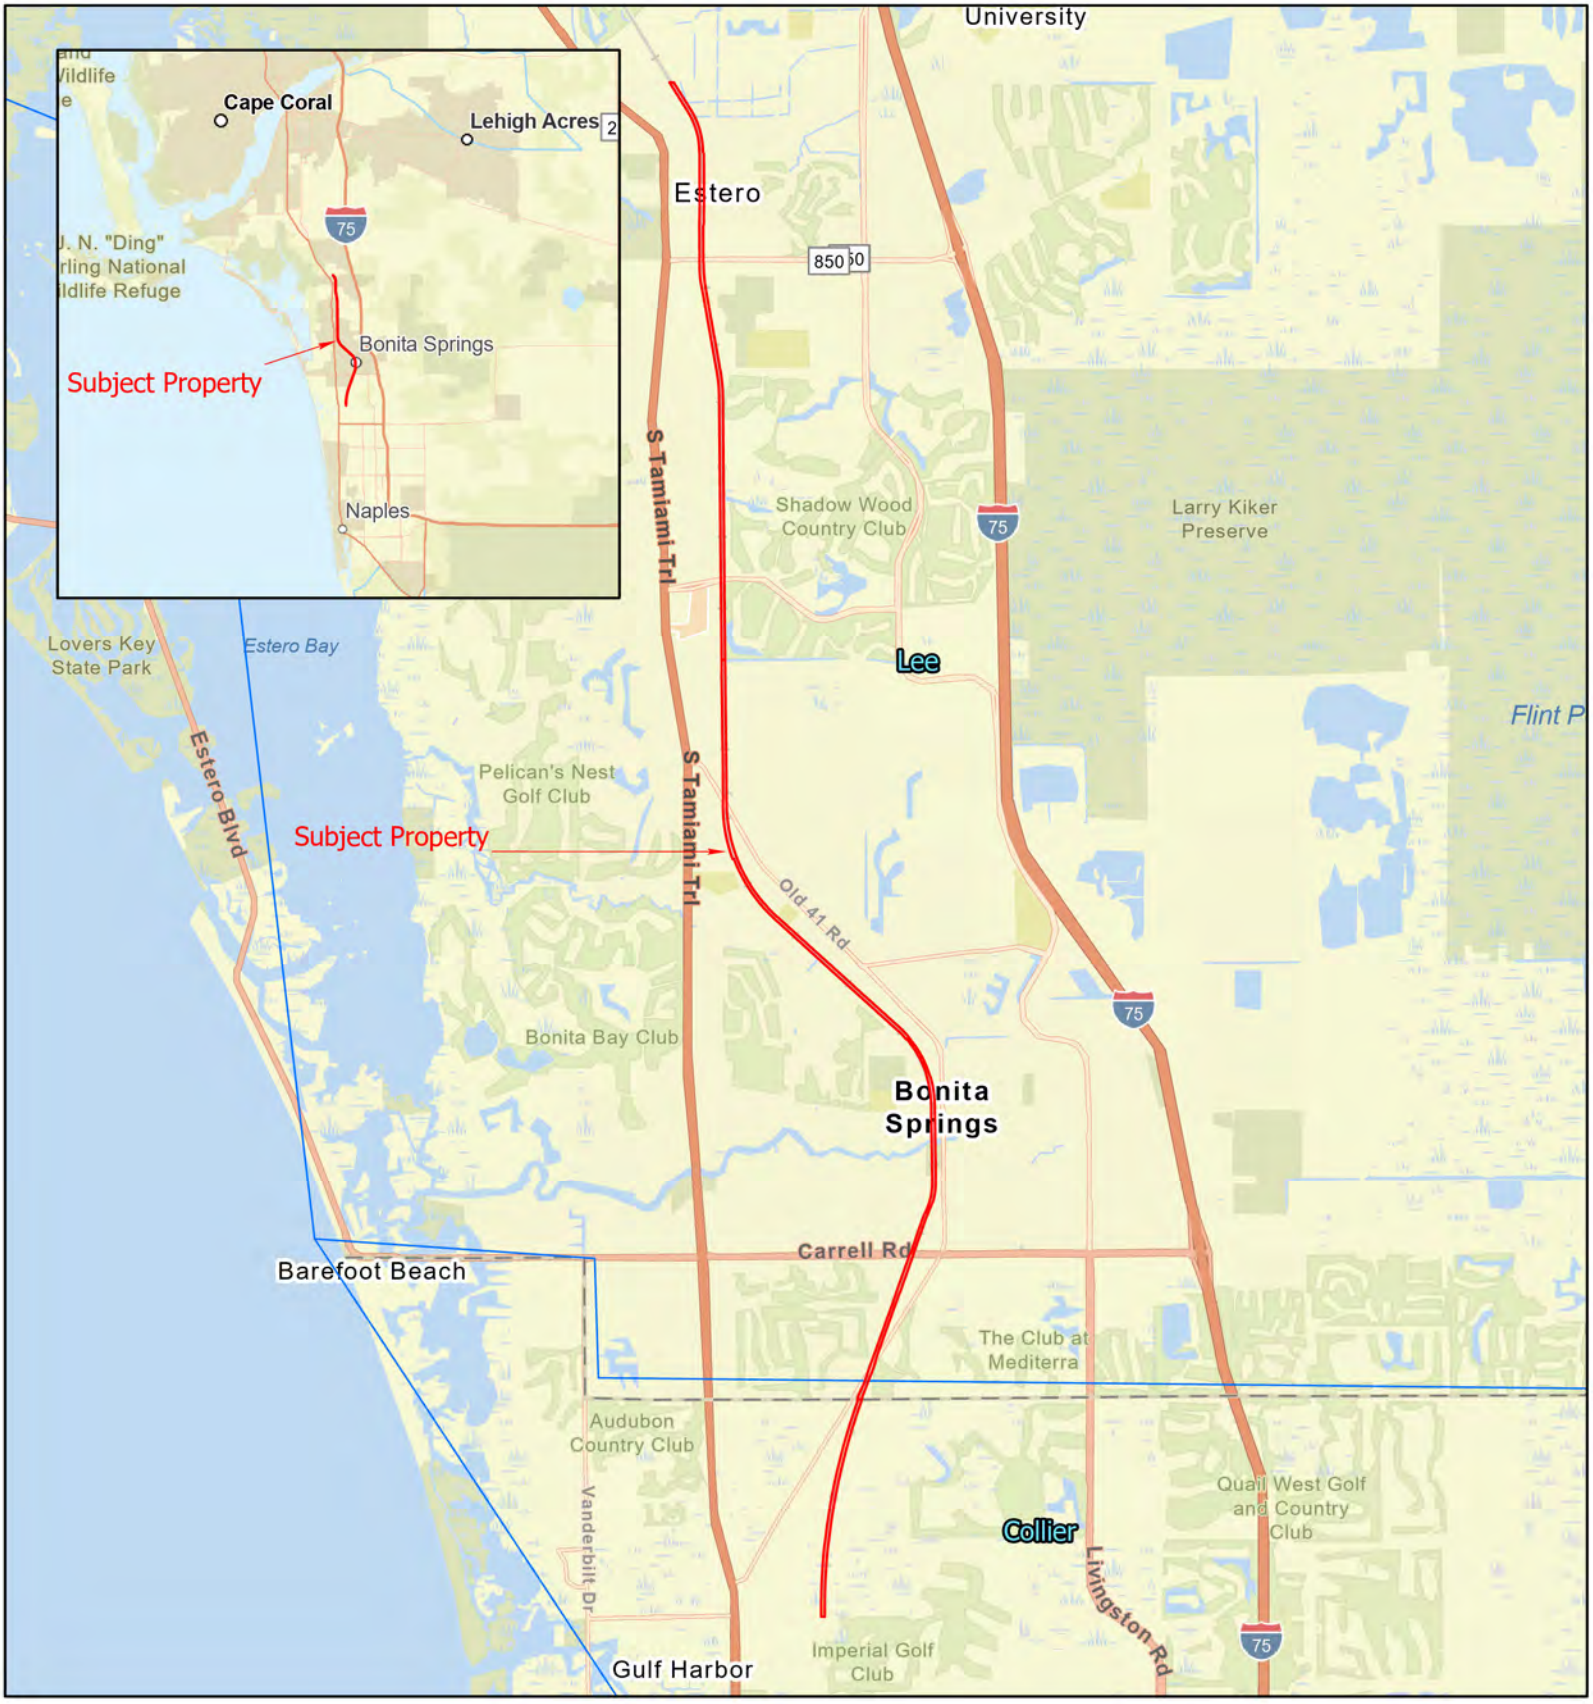
11 Qualifications and Signature of the Environmental Professional

I, Richard Stephens, am the qualified environmental professional who conducted the site assessment for this Phase I ESA.



I declare that, to the best of my knowledge and belief, I meet the definition of an Environmental Professional as defined in §312.10 of 40 CFR Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

NOT OFFICIAL RECORD

THIS CORRECTIVE CONFIRMATORY QUITCLAIM DEED, made this 24th day of June, 2019, between CSX TRANSPORTATION, INC., a Virginia corporation, whose mailing address is 500 Water Street, Jacksonville, Florida 32202, and ATLANTIC LAND AND IMPROVEMENT COMPANY, a Virginia corporation, whose mailing address is 500 Water Street, Jacksonville, Florida 32202, collectively hereinafter called "Grantor", and SEMINOLE GULF RAILWAY, L.P., a Delaware limited partnership, whose mailing address is 4110 Centerpointe Drive, Suite 207, Fort Myers, FL 33916, hereinafter called "Grantee".

(Wherever used herein, the terms "Grantor" and "Grantee" may be construed in the singular or plural as the context may require or admit, and for purposes of exceptions, reservations and/or covenants, shall include the heirs, legal representatives and assigns of individuals or the successors and assigns of corporations.)

WHEREAS, by deed dated November 1, 2018, recorded among the Public Land Records of Sarasota, Manatee, Desoto, Charlotte, Collier, and Lee Counties in Florida (the "Deed"), Grantor conveyed to Grantee a parcel or tract containing 1537.81 acres, more or less, of land in Sarasota, Manatee, Desoto, Charlotte, Collier, and Lee Counties, Florida (the "Premises") as shown on the maps in Exhibit A-1 and Exhibit A-2, described in Exhibit B, and more specifically shown on the map in Exhibit B-1, and

WHEREAS, the Deed did not include Atlantic Land and Improvement Company as grantor to quitclaim its interest, if any, to Seminole Gulf Railway, L.P., and

WHEREAS, Grantor is agreeable to executing a corrective deed for the purposes of including Atlantic Land and Improvement Company in the Deed to quitclaim its interest, if any, to Seminole Gulf Railway, L.P.

NOW, THEREFORE, for and in consideration of the sum of TEN AND NO/100 DOLLARS ($10.00), to it in hand paid by Grantee, the receipt of which is hereby acknowledged, Grantor does hereby RELEASE, REMISE and forever QUITCLAIM unto Grantee, its heirs, legal representatives and assigns, all right title and interest, if any, in the Premises shown on the maps in Exhibit A-1 and Exhibit A-2, described in Exhibit B, and more specifically shown on the map in Exhibit B-1, attached hereto and incorporated herein, and containing 1537.81 acres, more or less.

NOTE: THIS DEED HAS BEEN EXECUTED IN DUPLICATE FOR SIMULTANEOUS RECORDING IN SARASOTA, MANATEE, DESOTO, CHARLOTTE, COLLIER AND LEE COUNTIES.

EXCLUDING and excepting unto Grantor, its successors and assigns, that parcel located at 2919 South Street, Fort Myers, FL, as shown on Exhibit A-3, attached hereto and incorporated herein, being retained by Grantor.

TO HAVE AND TO HOLD the Premises, and all the estate, right, title, lien, interest and claim whatsoever of Grantor therein, either in law or equity, and all improvements thereon and appurtenances thereto, unto the proper use, benefit and enjoyment of Grantee, Grantee's heirs and assigns or successors and assigns, forever; SUBJECT to reservations, easements, covenants, restrictions and limitations of record or platted, all existing public utilities and roadways, and all existing encroachments, ways and servitudes, howsoever created.

Grantee acknowledges that the Land conveyed hereunder has been historically used for railroad industrial operations and other uses and is being conveyed for use only as industrial, commercial or non-residential property, Grantee, by acceptance of this deed, hereby covenants that it, its successors, heirs, legal representatives or assigns shall not use the Land for any purpose other than industrial or commercial purposes, and that the Land will not be used for (a) any residential purpose of any kind or nature (residential use shall be defined broadly to include, without limitation, any use of the Land by individuals or families for purposes of personal living, dwelling, or overnight accommodations, whether such uses are in single family residences, apartments, duplexes, or other multiple residential dwellings, trailers, trailer parks, camping sites, motels, hotels, or any other dwelling use of any kind), (b) any public or private school, day care, or any organized long-term or short term child care of any kind, (c) any recreational purpose (recreational use shall be defined broadly to include, without limitation, use as a public park, hiking or biking trail, athletic fields or courts, or public gathering place), (d) any agricultural purpose that results in, or could potentially result in, the human consumption of crops or livestock raised on the property (agricultural purpose shall be defined broadly to include, without limitation, activities such as food crop production, dairy farming, livestock breeding and keeping, and cultivation of grazing land that would ultimately produce, or lead to the production of, a product that could be consumed by a human) or (e) the establishment of a mitigation bank and/or the sale, lease, license, conveyance or in any way distribution of mitigation credits (collectively the "Environmental Use Restrictions"). Notwithstanding the foregoing, the above restrictions shall not apply to any uses of the Land pursuant to occupancy agreements with Grantee at the time of conveyance from Grantor to Grantee. By acceptance of this deed, Grantee further covenants that it, its successors, heirs, legal representatives or assigns shall not use the groundwater underneath the Land for human consumption, irrigation, or other purposes.

Grantee, by acceptance of this deed, hereby covenants that it, its successors, heirs, legal representatives or assigns shall not use the Land, or any tracks located thereon, for the long distance or commuter transportation of passengers, other than passenger excursions or similar local use (the "Passenger Use Restrictions").

By acceptance of this deed, Grantee further covenants that it, its successors, heirs, legal representatives and assigns shall abide by and be governed by this deed, including any Exhibits.

Grantee and Grantor agree and acknowledge that the covenants and easements contained in this Deed shall be covenants "in gross" and easements "in gross" which shall remain binding on Grantee, its successors, heirs, legal representatives and assigns regardless of whether Grantor continues to own the Land. Grantee acknowledges Grantor will continue to have a substantial interest in enforcement of the said covenants and easements whether or not Grantor retains title to the Land.

Said covenant(s) shall run with title to the Premises conveyed, and bind upon Grantee, Grantee's heirs, legal representatives and assigns, or corporate successors and assigns, and anyone claiming title to or holding Premises through Grantee.

This conveyance is made to correct an error made in a prior conveyance for which documentary stamp tax was previously made; therefore, minimum documentary stamp tax is due in accordance with Section 12B-4.014(3).

THIS CORRECTIVE CONFIRMATORY QUITCLAIM DEED IS BEING RECORDED TO INCLUDE ATLANTIC LAND AND IMPROVEMENT COMPANY, A VIRGINIA CORPORATION, AS A GRANTOR, WHO WAS NOT INCLUDED IN THAT CERTAIN QUITCLAIM DEED RECORDED IN OFFICIAL RECORDS INSTRUMENT #2018144543, OF THE PUBLIC RECORDS OF SARASOTA COUNTY, FLORIDA; INSTRUMENT #201841110518 AND OFFICIAL RECORDS BOOK 2754, PAGE 5154, OF THE PUBLIC RECORDS OF MANATEE COUNTY, FLORIDA; INSTRUMENT #201814006376, OF THE PUBLIC RECORDS OF DESOTO COUNTY, FLORIDA; OFFICIAL RECORDS BOOK 4375, PAGE 367, OF THE PUBLIC RECORDS OF CHARLOTTE COUNTY, FLORIDA; INSTRUMENT #2018000262032, OF THE PUBLIC RECORDS OF LEE COUNTY, FLORIDA; AND OFFICIAL RECORDS BOOK 5568, PAGE 941, OF THE PUBLIC RECORDS OF COLLIER COUNTY, FLORIDA.

QUITCLAIM DEED

THIS QUITCLAIM DEED, made this 1 day of November, 2018, between CSX TRANSPORTATION, INC., a Virginia corporation, whose mailing address is 500 Water Street, Jacksonville, Florida 32202, hereinafter called "Grantor", and Seminole Gulf Railway, L.P., a Delaware limited partnership ,whose mailing address is 4110 Centerpointe Drive, Suite 207, Fort Myers, FL 33916, hereinafter called "Grantee", WITNESSETH:

THAT Grantor, for and in consideration of the sum of TEN AND NO/100 DOLLARS ($10.00), and other good and valuable consideration, to it in hand paid by Grantee, the receipt of which is hereby acknowledged, does hereby RELEASE, REMISE and forever QUITCLAIM unto Grantee, its successors and assigns, all right, title and interest of Grantor, if any, in and to that certain tract or parcel of land situate, lying and being in the Counties of Manatee, Sarasota, DeSoto, Charlotte, Lee, and Collier, State of Florida, hereinafter designated "the Premises," as generally shown on the maps in Exhibit A-1 and Exhibit A-2, described in Exhibit B, and more specifically shown on the map in Exhibit B-1, attached hereto and incorporated herein.

EXCLUDING and excepting unto Grantor, its successors and assigns, that parcel located at 2919 South Street, Fort Myers, FL, as shown on Exhibit A-3, attached hereto and incorporated herein, being retained by Grantor.

TO HAVE AND TO HOLD the Premises, and all the estate, right, title, lien, interest and claim whatsoever of Grantor therein, either in law or equity, and all improvements thereon and appurtenances thereto, unto the proper use, benefit and enjoyment of Grantee, Grantee's heirs and assigns or successors and assigns, forever; SUBJECT to reservations, easements, covenants, restrictions and limitations of record or platted, all existing public utilities and roadways, and all existing encroachments, ways and servitudes, howsoever created.

NOTE: This Deed has been executed in duplicate for simultaneous recording in Sarasota, Manatee, Desoto, Charlotte, Collier and Lee Counties. All documentary stamp taxes have been paid and cancelled in Sarasota County.

Grantee acknowledges that the Land conveyed hereunder has been historically used for railroad industrial operations and other uses and is being conveyed for use only as industrial, commercial or non-residential property, Grantee, by acceptance of this deed, hereby covenants that it, its successors, heirs, legal representatives or assigns shall not use the Land for any purpose other than industrial or commercial purposes, and that the Land will not be used for (a) any residential purpose of any kind or nature (residential use shall be defined broadly to include, without limitation, any use of the Land by individuals or families for purposes of personal living, dwelling, or overnight accommodations, whether such uses are in single family residences, apartments, duplexes, or other multiple residential dwellings, trailers, trailer parks, camping sites, motels, hotels, or any other dwelling use of any kind), (b) any public or private school, day care, or any organized long-term or short term child care of any kind, (c) any recreational purpose (recreational use shall be defined broadly to include, without limitation, use as a public park, hiking or biking trail, athletic fields or courts, or public gathering place), (d) any agricultural purpose that results in, or could potentially result in, the human consumption of crops or livestock raised on the property (agricultural purpose shall be defined broadly to include, without limitation, activities such as food crop production, dairy farming, livestock breeding and keeping, and cultivation of grazing land that would ultimately produce, or lead to the production of, a product that could be consumed by a human) or (e) the establishment of a mitigation bank and/or the sale, lease, license, conveyance or in any way distribution of mitigation credits (collectively the "Environmental Use Restrictions"). Notwithstanding the foregoing, the above restrictions shall not apply to any uses of the Land pursuant to occupancy agreements with Grantee at the time of conveyance from Grantor to Grantee. By acceptance of this deed, Grantee further covenants that it, its successors, heirs, legal representatives or assigns shall not use the groundwater underneath the Land for human consumption, irrigation, or other purposes.

Grantee, by acceptance of this deed, hereby covenants that it, its successors, heirs, legal representatives or assigns shall not use the Land, or any tracks located thereon, for the long distance or commuter transportation of passengers, other than passenger excursions or similar local use (the "Passenger Use Restrictions").

By acceptance of this deed, Grantee further covenants that it, its successors, heirs, legal representatives and assigns shall abide by and be governed by this deed, including any Exhibits.

Grantee and Grantor agree and acknowledge that the covenants and easements contained in this Deed shall be covenants "in gross" and easements "in gross" which shall remain binding on Grantee, its successors, heirs, legal representatives and assigns regardless of whether Grantor continues to own the Land. Grantee acknowledges Grantor will continue to have a substantial interest in enforcement of the said covenants and easements whether or not Grantor retains title to the Land.

Said covenant(s) shall run with title to the Premises conveyed, and bind upon Grantee, Grantee's heirs, legal representatives and assigns, or corporate successors and assigns, and anyone claiming title to or holding Premises through Grantee.

IN WITNESS WHEREOF, CSX TRANSPORTATION, INC., pursuant to due corporate authority, has caused its name to be signed hereto by its officers hereunto duly authorized and its corporate seal, duly attested, to be hereunto affixed.

Signed, sealed and delivered

The **Just** value is the total parcel assessment (less any considerations for the cost of sale). This is the closest value to *Fair Market Value* we produce and is dated as of January 1st of the tax year in question (F.A.C. 12D-1.002).

The **Land** value is the portion of the total parcel assessment attributed to the land.

The **Market Assessed** value is the total parcel assessment (less any considerations for the cost of sale) based upon the assessment standard. Most parcels are assessed based either upon the *Highest and Best Use* standard or the *Present Use* standard (*F.S. 193.011)* . For *Agriculturally Classified* parcels (or parts thereof), only agricultural uses are considered in the assessment (*F.S. 193.461 (6) (a)*). The difference between the *Highest and Best Use/Present Use* and the *Agricultural Use* is often referred to as the *Agricultural Exemption*.
(i.e. Market Assessed = Just - Agricultural Exemption)

The **Capped Assessed** value is the *Market Assessment* after any *Save Our Homes* or *10% Assessment Limitation* cap is applied. This assessment cap is applied to all properties and limits year-to-year assessment increases to either the *Consumer Price Index* or 3%, whichever is lower for Homestead properties OR 10% for non-Homestead properties.

The **Exemptions** value is the total amount of all exemptions on the parcel.

The **Taxable** value is the *Capped Assessment* after exemptions (*Homestead, etc.*) are applied to it. This is the value that most taxing authorities use to calculate a parcel's taxes.
(i.e. Taxable = Capped Assessed - Exemptions)

The **Just** value is the total parcel assessment (less any considerations for the cost of sale). This is the closest value to *Fair Market Value* we produce and is dated as of January 1st of the tax year in question (F.A.C. 12D-1.002).

The **Land** value is the portion of the total parcel assessment attributed to the land.

The **Market Assessed** value is the total parcel assessment (less any considerations for the cost of sale) based upon the assessment standard. Most parcels are assessed based either upon the *Highest and Best Use* standard or the *Present Use* standard (*F.S. 193.011)* . For *Agriculturally Classified* parcels (or parts thereof), only agricultural uses are considered in the assessment (*F.S. 193.461 (6) (a)*). The difference between the *Highest and Best Use/Present Use* and the *Agricultural Use* is often referred to as the *Agricultural Exemption*.
(i.e. Market Assessed = Just - Agricultural Exemption)

The **Capped Assessed** value is the *Market Assessment* after any *Save Our Homes* or *10% Assessment Limitation* cap is applied. This assessment cap is applied to all properties and limits year-to-year assessment increases to either the *Consumer Price Index* or 3%, whichever is lower for Homestead properties OR 10% for non-Homestead properties.

The **Exemptions** value is the total amount of all exemptions on the parcel.

The **Taxable** value is the *Capped Assessment* after exemptions (*Homestead, etc.*) are applied to it. This is the value that most taxing authorities use to calculate a parcel's taxes.
(i.e. Taxable = Capped Assessed - Exemptions)

The **Just** value is the total parcel assessment (less any considerations for the cost of sale). This is the closest value to *Fair Market Value* we produce and is dated as of January 1st of the tax year in question (F.A.C. 12D-1.002).

The **Land** value is the portion of the total parcel assessment attributed to the land.

The **Market Assessed** value is the total parcel assessment (less any considerations for the cost of sale) based upon the assessment standard. Most parcels are assessed based either upon the *Highest and Best Use* standard or the *Present Use* standard (*F.S. 193.011)* . For *Agriculturally Classified* parcels (or parts thereof), only agricultural uses are considered in the assessment (*F.S. 193.461 (6) (a)*). The difference between the *Highest and Best Use/Present Use* and the *Agricultural Use* is often referred to as the *Agricultural Exemption*.
(i.e. Market Assessed = Just - Agricultural Exemption)

The **Capped Assessed** value is the *Market Assessment* after any *Save Our Homes* or *10% Assessment Limitation* cap is applied. This assessment cap is applied to all properties and limits year-to-year assessment increases to either the *Consumer Price Index* or 3%, whichever is lower for Homestead properties OR 10% for non-Homestead properties.

The **Exemptions** value is the total amount of all exemptions on the parcel.

The **Taxable** value is the *Capped Assessment* after exemptions (*Homestead, etc.*) are applied to it. This is the value that most taxing authorities use to calculate a parcel's taxes.
(i.e. Taxable = Capped Assessed - Exemptions)

The **Just** value is the total parcel assessment (less any considerations for the cost of sale). This is the closest value to *Fair Market Value* we produce and is dated as of January 1st of the tax year in question (F.A.C. 12D-1.002).

The **Land** value is the portion of the total parcel assessment attributed to the land.

The **Market Assessed** value is the total parcel assessment (less any considerations for the cost of sale) based upon the assessment standard. Most parcels are assessed based either upon the *Highest and Best Use* standard or the *Present Use* standard (*F.S. 193.011)* . For *Agriculturally Classified* parcels (or parts thereof), only agricultural uses are considered in the assessment (*F.S. 193.461 (6) (a)*). The difference between the *Highest and Best Use/Present Use* and the *Agricultural Use* is often referred to as the *Agricultural Exemption*.
(i.e. Market Assessed = Just - Agricultural Exemption)

The **Capped Assessed** value is the *Market Assessment* after any *Save Our Homes* or *10% Assessment Limitation* cap is applied. This assessment cap is applied to all properties and limits year-to-year assessment increases to either the *Consumer Price Index* or 3%, whichever is lower for Homestead properties OR 10% for non-Homestead properties.

The **Exemptions** value is the total amount of all exemptions on the parcel.

The **Taxable** value is the *Capped Assessment* after exemptions (*Homestead, etc.*) are applied to it. This is the value that most taxing authorities use to calculate a parcel's taxes.
(i.e. Taxable = Capped Assessed - Exemptions)

The **Just** value is the total parcel assessment (less any considerations for the cost of sale). This is the closest value to *Fair Market Value* we produce and is dated as of January 1st of the tax year in question (F.A.C. 12D-1.002).

The **Land** value is the portion of the total parcel assessment attributed to the land.

The **Market Assessed** value is the total parcel assessment (less any considerations for the cost of sale) based upon the assessment standard. Most parcels are assessed based either upon the *Highest and Best Use* standard or the *Present Use* standard (*F.S. 193.011)* . For *Agriculturally Classified* parcels (or parts thereof), only agricultural uses are considered in the assessment (*F.S. 193.461 (6) (a)*). The difference between the *Highest and Best Use/Present Use* and the *Agricultural Use* is often referred to as the *Agricultural Exemption*.
(i.e. Market Assessed = Just - Agricultural Exemption)

The **Capped Assessed** value is the *Market Assessment* after any *Save Our Homes* or *10% Assessment Limitation* cap is applied. This assessment cap is applied to all properties and limits year-to-year assessment increases to either the *Consumer Price Index* or 3%, whichever is lower for Homestead properties OR 10% for non-Homestead properties.

The **Exemptions** value is the total amount of all exemptions on the parcel.

The **Taxable** value is the *Capped Assessment* after exemptions (*Homestead, etc.*) are applied to it. This is the value that most taxing authorities use to calculate a parcel's taxes.
(i.e. Taxable = Capped Assessed - Exemptions)

The **Just** value is the total parcel assessment (less any considerations for the cost of sale). This is the closest value to *Fair Market Value* we produce and is dated as of January 1st of the tax year in question (F.A.C. 12D-1.002).

The **Land** value is the portion of the total parcel assessment attributed to the land.

The **Market Assessed** value is the total parcel assessment (less any considerations for the cost of sale) based upon the assessment standard. Most parcels are assessed based either upon the *Highest and Best Use* standard or the *Present Use* standard (*F.S. 193.011)* . For *Agriculturally Classified* parcels (or parts thereof), only agricultural uses are considered in the assessment (*F.S. 193.461 (6) (a)*). The difference between the *Highest and Best Use/Present Use* and the *Agricultural Use* is often referred to as the *Agricultural Exemption*.
(i.e. Market Assessed = Just - Agricultural Exemption)

The **Capped Assessed** value is the *Market Assessment* after any *Save Our Homes* or *10% Assessment Limitation* cap is applied. This assessment cap is applied to all properties and limits year-to-year assessment increases to either the *Consumer Price Index* or 3%, whichever is lower for Homestead properties OR 10% for non-Homestead properties.

The **Exemptions** value is the total amount of all exemptions on the parcel.

The **Taxable** value is the *Capped Assessment* after exemptions (*Homestead, etc.*) are applied to it. This is the value that most taxing authorities use to calculate a parcel's taxes.
(i.e. Taxable = Capped Assessed - Exemptions)

The **Just** value is the total parcel assessment (less any considerations for the cost of sale). This is the closest value to *Fair Market Value* we produce and is dated as of January 1st of the tax year in question (F.A.C. 12D-1.002).

The **Land** value is the portion of the total parcel assessment attributed to the land.

The **Market Assessed** value is the total parcel assessment (less any considerations for the cost of sale) based upon the assessment standard. Most parcels are assessed based either upon the *Highest and Best Use* standard or the *Present Use* standard (*F.S. 193.011)* . For *Agriculturally Classified* parcels (or parts thereof), only agricultural uses are considered in the assessment (*F.S. 193.461 (6) (a)*). The difference between the *Highest and Best Use/Present Use* and the *Agricultural Use* is often referred to as the *Agricultural Exemption*.
(i.e. Market Assessed = Just - Agricultural Exemption)

The **Capped Assessed** value is the *Market Assessment* after any *Save Our Homes* or *10% Assessment Limitation* cap is applied. This assessment cap is applied to all properties and limits year-to-year assessment increases to either the *Consumer Price Index* or 3%, whichever is lower for Homestead properties OR 10% for non-Homestead properties.

The **Exemptions** value is the total amount of all exemptions on the parcel.

The **Taxable** value is the *Capped Assessment* after exemptions (*Homestead, etc.*) are applied to it. This is the value that most taxing authorities use to calculate a parcel's taxes.
(i.e. Taxable = Capped Assessed - Exemptions)

The **Just** value is the total parcel assessment (less any considerations for the cost of sale). This is the closest value to *Fair Market Value* we produce and is dated as of January 1st of the tax year in question (F.A.C. 12D-1.002).

The **Land** value is the portion of the total parcel assessment attributed to the land.

The **Market Assessed** value is the total parcel assessment (less any considerations for the cost of sale) based upon the assessment standard. Most parcels are assessed based either upon the *Highest and Best Use* standard or the *Present Use* standard (*F.S. 193.011)* . For *Agriculturally Classified* parcels (or parts thereof), only agricultural uses are considered in the assessment (*F.S. 193.461 (6) (a)*). The difference between the *Highest and Best Use/Present Use* and the *Agricultural Use* is often referred to as the *Agricultural Exemption*.
(i.e. Market Assessed = Just - Agricultural Exemption)

The **Capped Assessed** value is the *Market Assessment* after any *Save Our Homes* or *10% Assessment Limitation* cap is applied. This assessment cap is applied to all properties and limits year-to-year assessment increases to either the *Consumer Price Index* or 3%, whichever is lower for Homestead properties OR 10% for non-Homestead properties.

The **Exemptions** value is the total amount of all exemptions on the parcel.

The **Taxable** value is the *Capped Assessment* after exemptions (*Homestead, etc.*) are applied to it. This is the value that most taxing authorities use to calculate a parcel's taxes.
(i.e. Taxable = Capped Assessed - Exemptions)

The **Just** value is the total parcel assessment (less any considerations for the cost of sale). This is the closest value to *Fair Market Value* we produce and is dated as of January 1st of the tax year in question (F.A.C. 12D-1.002).

The **Land** value is the portion of the total parcel assessment attributed to the land.

The **Market Assessed** value is the total parcel assessment (less any considerations for the cost of sale) based upon the assessment standard. Most parcels are assessed based either upon the *Highest and Best Use* standard or the *Present Use* standard (*F.S. 193.011)* . For *Agriculturally Classified* parcels (or parts thereof), only agricultural uses are considered in the assessment (*F.S. 193.461 (6) (a)*). The difference between the *Highest and Best Use/Present Use* and the *Agricultural Use* is often referred to as the *Agricultural Exemption*.
(i.e. Market Assessed = Just - Agricultural Exemption)

The **Capped Assessed** value is the *Market Assessment* after any *Save Our Homes* or *10% Assessment Limitation* cap is applied. This assessment cap is applied to all properties and limits year-to-year assessment increases to either the *Consumer Price Index* or 3%, whichever is lower for Homestead properties OR 10% for non-Homestead properties.

The **Exemptions** value is the total amount of all exemptions on the parcel.

The **Taxable** value is the *Capped Assessment* after exemptions (*Homestead, etc.*) are applied to it. This is the value that most taxing authorities use to calculate a parcel's taxes.
(i.e. Taxable = Capped Assessed - Exemptions)

The **Just** value is the total parcel assessment (less any considerations for the cost of sale). This is the closest value to *Fair Market Value* we produce and is dated as of January 1st of the tax year in question (F.A.C. 12D-1.002).

The **Land** value is the portion of the total parcel assessment attributed to the land.

The **Market Assessed** value is the total parcel assessment (less any considerations for the cost of sale) based upon the assessment standard. Most parcels are assessed based either upon the *Highest and Best Use* standard or the *Present Use* standard (*F.S. 193.011)* . For *Agriculturally Classified* parcels (or parts thereof), only agricultural uses are considered in the assessment (*F.S. 193.461 (6) (a)*). The difference between the *Highest and Best Use/Present Use* and the *Agricultural Use* is often referred to as the *Agricultural Exemption*.
(i.e. Market Assessed = Just - Agricultural Exemption)

The **Capped Assessed** value is the *Market Assessment* after any *Save Our Homes* or *10% Assessment Limitation* cap is applied. This assessment cap is applied to all properties and limits year-to-year assessment increases to either the *Consumer Price Index* or 3%, whichever is lower for Homestead properties OR 10% for non-Homestead properties.

The **Exemptions** value is the total amount of all exemptions on the parcel.

The **Taxable** value is the *Capped Assessment* after exemptions (*Homestead, etc.*) are applied to it. This is the value that most taxing authorities use to calculate a parcel's taxes.
(i.e. Taxable = Capped Assessed - Exemptions)

The **Just** value is the total parcel assessment (less any considerations for the cost of sale). This is the closest value to *Fair Market Value* we produce and is dated as of January 1st of the tax year in question (F.A.C. 12D-1.002).

The **Land** value is the portion of the total parcel assessment attributed to the land.

The **Market Assessed** value is the total parcel assessment (less any considerations for the cost of sale) based upon the assessment standard. Most parcels are assessed based either upon the *Highest and Best Use* standard or the *Present Use* standard (*F.S. 193.011)* . For *Agriculturally Classified* parcels (or parts thereof), only agricultural uses are considered in the assessment (*F.S. 193.461 (6) (a)*). The difference between the *Highest and Best Use/Present Use* and the *Agricultural Use* is often referred to as the *Agricultural Exemption*.
(i.e. Market Assessed = Just - Agricultural Exemption)

The **Capped Assessed** value is the *Market Assessment* after any *Save Our Homes* or *10% Assessment Limitation* cap is applied. This assessment cap is applied to all properties and limits year-to-year assessment increases to either the *Consumer Price Index* or 3%, whichever is lower for Homestead properties OR 10% for non-Homestead properties.

The **Exemptions** value is the total amount of all exemptions on the parcel.

The **Taxable** value is the *Capped Assessment* after exemptions (*Homestead, etc.*) are applied to it. This is the value that most taxing authorities use to calculate a parcel's taxes.
(i.e. Taxable = Capped Assessed - Exemptions)

SCHEDULE B, PART I Requirements

All of the following Requirements must be met:

1. The Proposed Insured must notify the Company in writing of the name of any party not referred to in this Commitment who will obtain an interest in the Land or who will make a loan on the Land. The Company may then make additional Requirements or Exceptions.

2. Pay the agreed amount for the estate or interest to be insured.

3. Pay the premiums, fees, and charges for the Policy to the Company.

4. Documents satisfactory to the Company that convey the Title or create the Mortgage to be insured, or both, must be properly authorized, executed, delivered, and recorded in the Public Records.

A. Duly executed Deed from Seminole Gulf Railway, L.P., a Delaware limited partnership, (the "Limited Partnership"), executed by a general partner(s), to the Proposed Insured, conveying the Land.

The Company will require the following as to the Limited Partnership:

1. Proof that the Limited Partnership was created prior to acquiring title and is currently in good standing.
2. Present for review a copy of the Limited Partnership agreement and any amendments thereto and proof of compliance with the terms of the agreement.
3. Unless the Limited Partnership agreement provides otherwise, if the transaction is a sale of all or substantially all of the Limited Partnership's assets or is outside the ordinary course of its business, proof that all general partners and the limited partners owning a majority in interest have consented to the transaction, as required by sections 620.1402 and 620.1406, Florida Statutes.
4. Record in the Official Records an affidavit executed by a general partner stating:

a) The name of the current general partner(s);
b) The general partner(s) executing the deed has authority to convey;
c) Whether the transaction is a sale of all or substantially all of the assets of the Limited Partnership;
d) Whether the transaction is in the ordinary course of the Limited Partnership's business;
e) If the transaction is a sale of all or substantially all of the Limited Partnership's assets or is outside the ordinary course of its business, that all general partners and the limited partners owning a majority in interest have consented to the transaction; and
f) Neither the general partner(s) executing the deed, nor the Limited Partnership, has been a debtor in bankruptcy during the existence of the Limited Partnership.

5. If any general partner(s) executing the deed is a business entity, proof of the good standing of the entity and proof of authority of the person(s) who will sign on behalf of the entity.

The Company reserves the right to make additional requirements upon review of the information above.

5. Proof of payment of any outstanding assessments in favor of Collier County, Florida, any special taxing district and any municipality. NOTE: If this requirement is not satisfied the following exception will appear on

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

6. Proof of payment of service charges for water, sewer, waste and gas, if any, through the date of closing.
   NOTE: If this requirement is not met the following exception will appear on Schedule B:

Copyright 2021 American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

Any lien provided for by Florida Statutes in favor of any city, town, village or port authority for unpaid service charges for service by any water, sewer, waste or gas system supplying the insured land or service facilities.

7. An Affidavit in form acceptable to Commonwealth Land Title Insurance Company ("Company") and executed by or on behalf of the current record owner(s) of the subject property stating: (1) that there are no parties in possession of the subject property other than said current record owner(s); (2) that there are no encumbrances upon the subject property other than as may be set forth in this Commitment and (3) there are no unrecorded assessments which are due and payable to Collier County, Florida, and if located within a municipality, service charges for water, sewer, waste and gas, if any, are in fact paid through the date of this Affidavit; and (4) that there have been no improvements made to or upon the subject property within the ninety
(90) day period last past (from the date of such affidavit) for which there remain any outstanding and unpaid bills for labor, materials or supplies for which a lien or liens may be claimed must be furnished to Commonwealth Land Title Insurance Company, or, in lieu thereof, an exception to those matters set forth in said Affidavit which are inconsistent with or deviate from the foregoing requirements will appear in the policy or policies to be issued pursuant to this Commitment.

8. Satisfaction and release of that certain Leasehold Mortgage and Security Agreement executed by Seminole Gulf Railway, L.P., a Delaware limited partnership, Mortgagor, in favor of First Union National Bank of Florida, Mortgagee, dated September 26, 1996, in the original principal amount of $5,400,000.00, recorded September 27, 1996, in Official Records Book 2233, Page 1475 as modified by Leasehold Mortgage Modification and Extension Agreement recorded in Official Records Book 2473, page 1605 and Second Leasehold Mortgage Modification and Extension Agreement recorded in Official Records Book 3066, page 702, of the public records of Collier County, Florida and release of the following collateral security instrument(s):

   a) Assignment of Leases, Rents, Profits, Permits, Approvals Licenses, Warranties and Agreements recorded September 27, 1996, in Official Records Book 2233, page 1521.

   AND

   That certain Leasehold Mortgage and Security Agreement executed by Seminole Gulf Railway, L.P., a Delaware limited partnership, Mortgagor, in favor of First Union National Bank of Florida, Mortgagee, dated September 26, 1996, in the original principal amount of $5,400,000.00, recorded September 27, 1996, in Official Records Book 2748, page 2347 as modified by Leasehold Mortgage Modification and Extension Agreement recorded in Official Records Book 3026, page 3848 and Second Leasehold Mortgage Modification and Extension Agreement recorded in Official Records Book 3674, page 852, of the public records of Lee County, Florida and release of the following collateral security instrument(s):

   a) Assignment of Leases, Rents, Profits, Permits, Approvals Licenses, Warranties and Agreements recorded September 27, 1996, in Official Records Book 2748, page 2393.

   Note: The original promissory note secured by the above described mortgage must be produced and cancelled and if this is an equity line mortgage, in addition to satisfying the mortgage, the equity line must be closed and terminated prior to closing.

16. The Proposed Policy Amount(s) must be disclosed to the Company, and subject to approval by the Company, entered as the Proposed Policy Amount. An owner's policy should reflect the purchase price or full value of the Land. A loan policy should reflect the loan amount or value of the property as collateral. Proposed Policy Amount(s) will be revised and premiums charged consistent therewith when the final amounts are approved.

17. This is a preliminary commitment that requires the review and approval by the state and/or national underwriting office for the company. Accordingly, this commitment is not effective to bind the company until the necessary approval is obtained from the state and/or national underwriting office for the company. The company reserves the right to add additional requirements and/or exceptions as deemed necessary upon said review.

18. Record in the Public Records a termination of the UCC Financing Statement in favor of Paradise Bank recorded in Official Records Book 6427, Page 1304, Public Records of Collier County, Florida.

(as to Segment 3)

19. To terminate the following:

Notice of Commencement recorded on 06/26/2025 in Official Records Book 6482, Page 3396, Public Records of Collier County, Florida.

1. Record a notice of termination, together with a contractor's final payment affidavit (with lien waiver). A separate notice of termination, and contractor's final payment affidavit (with lien waiver), is required for each notice of commencement.

2. Obtain an owner's construction affidavit identifying all parties who have a direct contract with the owner, all parties who served a notice to owner, and all parties who began furnishing labor, services or materials within the last 45 days.

3. Obtain a waiver and release of lien upon final payment from (i) all lienors showing as unpaid in the contractor's final payment affidavit (with lien waiver), (ii) all those who served a notice to owner or had a direct contract with the owner as listed in the owner's construction affidavit, and (iii) all those who began furnishing labor, services or materials within the last 45 days.

4. Obtain the Company's indemnity agreement signed by the owner/borrower.

NOTE: If the notice of commencement is being terminated prior to completion of the construction or if the subject transaction exceeds your agency's authorized limits, then approval of a Company State or Regional Underwriter is required.

(as to Segment 3)

20. To terminate the following:

Notice of Commencement recorded on 07/23/2025 in Official Records Book 6491, Page 1345, Public Records of Collier County, Florida.

1. Record a notice of termination, together with a contractor's final payment affidavit (with lien waiver). A separate notice of termination, and contractor's final payment affidavit (with lien waiver), is required for each notice of commencement.

NOTE: Effective July 1, 2023, the Conveyances to Foreign Entities Act in sections 692.201 - 692.205, Florida Statutes (the “Act”), limits and regulates the purchase, sale and ownership of Florida real property by certain buyers who are associated with “foreign countries of concern,” specifically the People’s Republic of China, the Russian Federation, the Islamic Republic of Iran, the Democratic People’s Republic of Korea, the Republic of Cuba, the Venezuelan regime of Nicolás Maduro and the Syrian Arab Republic. In connection with the purchase of real property, the Act requires each buyer to provide an affidavit confirming the purchaser is in compliance with the Act. Any loss or damage resulting from a violation of the Act is excluded from coverage under the terms of the Policy.

NOTE: Starting January 1, 2024, section 695.26 (1)(c), F.S., provides that no instrument conveying, assigning, encumbering or otherwise disposing of an interest in real property which is executed or acknowledged in Florida shall be recorded by the clerk of court unless the post office address of each witness is legibly printed, typed or stamped upon the instrument. If an instrument containing one or more witnesses is recorded, the witnesses’ addresses, as well as their names, should appear below their signatures. A business address may be used.

SCHEDULE B, PART II Exceptions

Some historical land records contain Discriminatory Covenants that are illegal and unenforceable by law. This Commitment and the Policy treat any Discriminatory Covenant in a document referenced in Schedule B as if each Discriminatory Covenant is redacted, repudiated, removed, and not republished or recirculated. Only the remaining provisions of the document will be excepted from coverage.

The Policy will not insure against loss or damage resulting from the terms and conditions of any lease or easement identified in Schedule A, and will include the following Exceptions unless cleared to the satisfaction of the Company:

1. Defects, liens, encumbrances, adverse claims or other matters, if any, created, first appearing in the public records or attaching subsequent to the effective date hereof but prior to the date the proposed insured acquires for value of record the estate or interest or mortgage thereon covered by this form.

2. Taxes and assessments for the year 20246 and subsequent years, which are not yet due and payable.

3. Standard Exceptions:

   A. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land.

   B. Rights or claims of parties in possession not shown by the public records.

   C. Any lien, or right to a lien, for services, labor, or materials heretofore or hereafter furnished, imposed by law and not shown by the public records.

   D. Taxes or assessments which are not shown as existing liens in the public records.

4. Any claim that any portion of the insured land is sovereign lands of the State of Florida, including submerged, filled or artificially exposed lands accreted to such land.

5. Any lien provided by County Ordinance or by Chapter 159, Florida Statutes, in favor of any city, town, village or port authority for unpaid service charges for service by any water, sewer or gas system supplying the insured land.

IN COLLIER COUNTY, FLORIDA:

6. Crossings for roads and highways over and/or through all rights of way as set out in Deed Book 4, page 573, public records of Collier County, Florida. (as to Segment 3)

7. License Agreement by and between Seaboard Coast Line Railroad Company and Collier County as evidenced by Affidavit recorded April 4, 1996 in Official Records Book 2166, page 1735, public records of Collier County Florida. (as to Segment 3)

8. Restrictions and Easements as set out in Quit Claim Deed recorded in Official Records Book 5568, Page 941 and Corrective Quit Claim Deed recorded in Official Records Book 5645, page 3121, of the public records of Collier County, Florida. (as to Segment 3)

~~SCHEDULE B, PART II Exceptions~~

21. Restrictions and Easements as set out in Quit Claim Deed recorded in Official Records Instr.#201800023~~6~~2032, and Corrective Quit Claim Deed recorded in Official Records Instr.#2019000150246, public records of Lee County, Florida. (Affected segment cannot be determined without survey)

22. Crossings for roads and highways over and/or through all right of ways in Lee County, Florida. (Affected segment cannot be determined without survey)

23. The nature, extent or existence of riparian rights or littoral rights is not insured. (Affected segment cannot be determined without survey)

24. Easement(s) in favor of Florida Power & Light Company, set forth in instrument(s) recorded in Official Records Book 6456, Page 2172, Public Records of Collier County, Florida. (as to Segment 3)

NOTE: Exception 1 above shall be deemed deleted as of the time the settlement funds or proceeds of the loan to be secured by the insured mortgage, as applicable, are disbursed by the Company or its authorized agent. Neither the Company nor its agent shall, however, be under any duty to disburse any sum except upon a determination that no such adverse intervening matters have appeared of record or occurred.

NOTES ON STANDARD EXCEPTIONS:

Item 3A will be deleted from the policy(ies) upon receipt of an accurate survey of the Land acceptable to the Company. Exception will be made for any encroachment, setback line violation, overlap, boundary line dispute or other adverse matter disclosed by the survey.

Items 3B, 3C, and 3D will be deleted from the policy(ies) upon receipt of an affidavit acceptable to the Company, affirming that, except as disclosed therein (i) no parties in possession of the Land exist other than the record owner(s); (ii) no improvements have been made to the Land within 90 days prior to closing which have not have been paid for in full; and (iii) no unpaid taxes or assessments are against the Land which are not shown as existing liens in the public records. Exception will be made for matters disclosed in the affidavit.

NOTE: All recording references in this form shall refer to the public records of Collier County, Florida, unless otherwise noted.

NOTE: In accordance with Florida Statutes section 627.4131, please be advised that the insured hereunder may present inquiries, obtain information about coverage, or receive assistance in resolving complaints, by contacting Commonwealth Land Title Insurance Company, 6420 Southpoint Parkway, Jacksonville, FL 32216; Telephone 904-633-9494.

Source Description

Source Description :

The Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.
The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Waste Description :	CH293601- ISOPROPYL ALCOHOL SOLUTION- WASTE ISOPROPYL ALCOHOL FROM COMPONENT CLEANING PROCESS.
Primary NAICS :	334419 - Other Electronic Component Manufacturing
Source Code :	G08 - Removal of spent process liquids or catalysts (bulk removal of wastes from chemical manufacturing or processing, etc.)
Form Code :	W203 - Concentrated non-halogenated (e.g., non-chlorinated) solvent
Management Method :	H141 - The site receiving this waste stored/bulked and transferred the waste with no treatment or recovery (H010-H129), fuel blending (H061), or disposal (H131-H135) at that receiving site.
Generation Tons :	1.4915
Managed Tons :	0
Shipped Tons :	1.4915
Received Tons :	0
Receiver ID :	TXD055141378
Receiver State :	TX
Shipper ID :	FLR000154252
Shipper State :	FL
Waste Minimization :	X - No waste minimization efforts were implemented for this waste
Waste Code List :	D001
Waste Code Group :	D001 - IGNITABLE WASTE
Waste Generation Type :	N/R
Report Cycle :	2021
Hazardous Waste Page Number :	10
Hazardous Waste Sub-Page Number :	1
BR Form :	GM
Waste Description :	WASTE CYANIDES, INORGANIC, SOLID N.O.S. (GOLD, POTASSIUM CYANIDE)
Primary NAICS :	334419 - Other Electronic Component Manufacturing
Source Code :	G03 - Plating and phosphating (electro- or non-electroplating or phosphating)
Form Code :	W312 - Cyanide or metal cyanide bearing solids, salts or chemicals
Management Method :	H010 - Metals recovery including retorting, smelting, chemical, etc.
Generation Tons :	0.03
Managed Tons :	0
Shipped Tons :	0.03
Received Tons :	0
Receiver ID :	NCD095119210
Receiver State :	NC
Shipper ID :	FLR000154252
Shipper State :	FL
Waste Minimization :	A - Cont. initiative to reduce qty and/or toxicity
Waste Code List :	D003, F008

Map Id: B17
Direction: S
Distance: 0.035 mi., 183 ft.
Elevation: 15 ft.

BRS ***(cont.)***

Waste Code Group :	F008 - PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.
Waste Generation Type :	N/R
Report Cycle :	2021
Hazardous Waste Page Number :	11
Hazardous Waste Sub-Page Number :	1
BR Form :	GM
Waste Description :	WASTE CYANIDE SOLUTIONS, N.O.S. (POTASSIUM CYANIDE, GOLD CYANIDE)
Primary NAICS :	334419 - Other Electronic Component Manufacturing
Source Code :	G03 - Plating and phosphating (electro- or non-electroplating or phosphating)
Form Code :	W107 - Aqueous waste containing cyanides (generally caustic)
Management Method :	H010 - Metals recovery including retorting, smelting, chemical, etc.
Generation Tons :	0.01
Managed Tons :	0
Shipped Tons :	0.01
Received Tons :	0
Receiver ID :	NCD095119210
Receiver State :	NC
Shipper ID :	FLR000154252
Shipper State :	FL
Waste Minimization :	A - Cont. initiative to reduce qty and/or toxicity
Waste Code List :	D003, F007
Waste Code Group :	F007 - SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.
Waste Generation Type :	N/R
Report Cycle :	2021
Hazardous Waste Page Number :	12
Hazardous Waste Sub-Page Number :	1
BR Form :	GM
Waste Description :	CH678119 WASTE AEROSOLS, FLAMMABLE
Primary NAICS :	334419 - Other Electronic Component Manufacturing
Source Code :	G11 - Discarding off-specification, out-of-date, and/or unused chemicals or products
Form Code :	W001 - Lab packs from any source not containing acute hazardous waste
Management Method :	H141 - The site receiving this waste stored/bulked and transferred the waste with no treatment or recovery (H010-H129), fuel blending (H061), or disposal (H131-H135) at that receiving site.

Source Description

Source Description : All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.

FRS ***(cont.)***

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Hazardous Waste Summary

Waste Code / Name :	D001 - IGNITABLE WASTE D002 - CORROSIVE WASTE D003 - REACTIVE WASTE F006 - WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM. F007 - SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS. F008 - PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description : AIR contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. AFS contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. The Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Hazardous Waste Summary
Waste Code / Name : D007 - CHROMIUM
D039 - TETRACHLOROETHYLENE
D040 - TRICHLOROETHYLENE

Waste Code / Name :

F002 - THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.
The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description
Source Description : RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.
TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Facility Address :	25061 OLD 41 RD, BONITA SPRINGS, FL 34135-7041
County :	LEE
Date Form Received by Agency :	2011-06-15
EPA ID :	FLR000057307
Mailing Address :	4636 SCARBOROUGH DR, LUTZ, FL 33559-8506
Contact :	JOHN RAUSCHENBACH
Contact Address :	25061 OLD 41 RD, BONITA SPRINGS, FL 34135-7041
Contact Country :	US
Contact Telephone :	239-992-1400
Contact Email :	JRAUSCHENBACH@PREFERREDMATERIALS.COM
EPA Region :	04
Land Type :	Private
Source Type :	Implementer
Classification :	Not a generator, verified
Description :	Not a generator, verified
Last Date in Agency List :	2026-05-05

Owner/Operator Summary

Owner/Operator Name :	RINKER MATERIALS
Owner/Operator Address :	1501 BELVEDERE RD, WEST PALM BEACH, FL 33406-1501
Owner/Operator Country :	US
Owner/Operator Telephone :	877-743-7237
Owner/Operator Email :	N/R
Owner/Operator Fax :	N/R
Legal Status :	Private
Owner/Operator Type :	Owner
Owner/Operator Start Date :	1999-06-16
Owner/Operator End Date :	N/R

Handler Activities Summary

U.S. Importer of Hazardous Waste :	N
Mixed Waste (Haz. and Radioactive) :	N
Recycler of Hazardous Waste :	N
Transporter of Hazardous Waste :	N
Treater, Storer or Disposer of HW :	N
Underground Injection Activity :	N
On-site Burner Exemption :	N
Furnace Exemption :	N
Used Oil Fuel Burner :	N

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.
SSTS tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description : The Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.
The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description
Source Description : AIR contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
AFS contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.
The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description : RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.
TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Used Oil Transporter : N

Historical Generators
Date Form Received by Agency : 1991-12-05
Facility Name : CEMEX LLC - WIGGINS PASS
Classification : Small Quantity Generator

Hazardous Waste Summary
Waste Code / Name : D001 - IGNITABLE WASTE

Notices of Violations Summary
Regulation Violated : N

Evaluation Action Summary
Evaluation Date : 2013-03-14
Evaluation : COMPLIANCE ASSISTANCE VISIT
Area of Violation : N/R
Date Achieved Compliance : N/R
Evaluation Lead Agency : State

T 2 - FL

Facility Name : CEMEX - WIGGINS PASS READY MIX AND BLOCK
Facility Address : 1425 WIGGINS PASS ROAD EAST, NAPLES, FL 34110
County : Collier

Source Description

Source Description :

The Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.
NCDB supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

Source Description : RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.
SSTS tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.
